as spinning is still involved in around 60 of all aircraft accidents bfu 1985 and belcastro 2009 this aerodynamic phenomenon is still not fully understood as u s and european certification specifications do not require recoveries from fully developed spins of normal category aeroplanes certification test flights will not discover aeroplane mass and centre of gravity combinations which may result in unrecoverable spins this book aims to contribute to a better understanding of the spin phenomenon through investigating the spin regime for normal utility and aerobatic aircraft and to explain what happens to the aircraft in terms of the aerodynamics flight mechanics and the aircraft stability the approach used is to vary the main geometric parameters such as the centre of gravity position and the aeroplane s mass across the flight envelope and to investigate the subsequent effect on the main spin characteristic parameters such as the angle of attack pitch angle sideslip angle rotational rates and recovery time first of all a literature review sums up the range of technical aspects that affect the problem of spinning it reviews the experimental measurement techniques used theoretical methods developed and flight test results obtained by previous researchers the published results have been studied to extract the effect on spinning of aircraft geometry control surface effectiveness flight operational parameters and atmospheric effects consideration is also made of the influence on human performance of spinning the current spin regulations and the available training material for pilots a conventional geometry single engine low wing aeroplane the basic trainer fuji fa 200 160 has been instrumented with a proven digital flight measurement system and 27 spins have been systematically conducted inside and outside the certified flight envelope the accuracy of the flight measurements is ensured through effective calibration and the choice of sensors has varied through the study with earlier sensors suffering from more drift than the current sensors belcastro 2009 and schrader 2013 in flight parameter data collected includes left and right wing  $\alpha$  and  $\beta$  angles roll pitch yaw angles and corresponding rates all control surface deflections vertical speeds altitude losses and the aeroplane s accelerations in all three directions such data have been statistically analysed the pitch behaviour has been mathematically modelled on the basis of the gathered flight test data nine observations have been proposed these mainly cover the effects of centre of gravity and aircraft mass variations on spin characteristic behaviour they have all been proven as true through the results of this thesis the final observation concerns the generalisation of the fuji results to the spin behaviour of other aircraft in the same category these

observations can be used to improve flight test programmes aircraft design processes flight training materials and hence contribute strongly to better flight safety

a veteran hockey writer takes on hockey culture and the nhl addressing the games most controversial issue whether its on ice fist fights or head shots into the glass hockey has become a nightly news spectacle with players pummeling and bashing each other across the ice like drunken gladiators and while the nhl may actually condone on ice violence as a ticket draw diehard hockey fan and expert adam proteau argues against hockeys transformation into a thuggish blood sport in fighting the good fight proteau sheds light on the many perspectives of those in and around the game with interviews of current and former nhl stars coaches general managers and league executives as well as medical experts one of the most well known media figures on the hockey scene today famous for his funny feisty observations as a writer for the toronto star and the hockey news and commentator on cbc radio and tv adam proteau is also one of the few mainstream media voices who is vehemently anti fighting in hockey not only is his book a plea to the games gatekeepers to finally clamp down on the runaway violence that permeates the sport even at its highest level he offers realistic suggestions on ways to finally clean the game up includes interviews with medical experts on head injuries and concussions as well as with other members of the media the author not only wages an attack on the value of fighting in hockey but also on the establishment hockey culture covering the most polarizing issue in hockey today fighting the good fight gives hockey fans and sports lovers everywhere a reason to stamp their feet and whistle at a rare display of eloquence and common sense webcatupdater profile 5 1326742169646

asphalt rubber which is produced by reacting asphalt cement and crumb rubber is claimed to increase fatigue life and reduce rutting of asphalt concrete however the service life must be increased significantly to offset the additional cost of adding the rubber in order to assess the performance of asphalt rubber mixtures and how effectively they can be used in construction test sections of asphalt concrete surface courses using either asphalt rubber binder or the conventional binder were installed on a heavily traveled highway in northern virginia special equipment was required to blend the asphalt cement and crumb rubber however the production of the mixture and construction of the test sections were accomplished with minimal problems various laboratory tests including marshall gyratory shear creep resilient modulus indirect tensile strength and stripping were used to evaluate the mixtures in the laboratory the results indicated that the asphalt rubber mixtures were more susceptible to permanent deformation than the same mixtures without rubber however the conventional temperature at which the mixtures were compacted and tested with the gyratory shear machine may not have presented a true estimate of performance because pavement deformation occurs at lower temperatures friction numbers of one section of asphalt rubber mixture were significantly lower at a 95 percent confidence level than friction numbers of the other asphalt rubber section possibly the result of the pavement surface being filled by soil from a nearby construction project however there was no difference at a 95 percent confidence level between the average friction values of the control and asphalt rubber sections surveys of pavement performance measurements of rut depth and friction tests will be conducted periodically and a final report will be published june 30 1994
