space is again in the headlines e billionaires jeff bezos and elon musk are planning to colonize mars president trump wants a space force to achieve space dominance with expensive high tech weapons the space and nuclear arms control regimes are threadbare and disintegrating

would be asteroid collision diverters space solar energy collectors asteroid miners and space geo engineers insistently promote their earth changing mega projects given our many looming planetary catastrophes from extreme climate change to runaway artificial superintelligence looking beyond the earth for solutions might seem like a sound strategy for humanity and indeed bolstered by a global network of fervent space advocates and seemingly rendered plausible even inevitable by oceans of science fiction and the wizardry of modern cinema space beckons as a fully hopeful path for human survival and flourishing a positive future in increasingly dark times but despite even basic questions of feasibility will these many space ventures really have desirable effects as their advocates insist in the first book to critically assess the major consequences of space activities from their origins in the 1940s to the present and beyond daniel deudney argues in dark skies that the major result of the space age has been to increase the likelihood of global nuclear war a fact conveniently obscured by the failure of recognize that nuclear armed ballistic missiles are inherently space weapons the most important practical finding of space age science also rarely emphasized is the discovery that we live on oasis earth tiny and fragile and teeming with astounding life but surrounded by an utterly desolate and inhospitable wilderness stretching at least many trillions of miles in all directions as he stresses our focus must be on earth and nowhere else looking to the future deudney provides compelling reasons why space colonization will produce new threats to human survival and not alleviate the existing ones that is why he argues we should fully relinquish the quest mind bending and profound dark skies challenges virtually all received wisdom about the final frontier
