x by wire unmanned ground vehicles ugvs have been attracting increased attention for various civilian or military applications the x by wire techniques drive by wire steer by wire and brake by wire techniques provide the possibility of achieving novel vehicle design and advanced dynamics control which can significantly improve the overall performance maneuverability and mobility of the ugvs however there are few full x by wire ugvs prototype models reported in the world therefore there is no book that can fully describe the design configuration and dynamics control approach of full x by wire ugvs which makes it difficult for readers to study this hot and interesting topic in this book we use a full x by wire ugv developed by our group as the example this ugv is completely x by wire with four in wheel motors driven and a four wheel independent steer steer in this book the overall design of the ugv the design of the key subsystems battery pack system in wheel motor driven system independent steer system remote and autonomous control system and the dynamics control approach will be introduced in detail and the experiment s results will be provided to validate the proposed dynamics control approach
