we live in a context of change whereby postmodernity shapes our understanding and our searching for truth postmodernity dictates not only what kind of results we obtain in our researches but also on the ways we use to search for truth this means that postmodernity dictates the ways we do research in various disciplines the ways we use to analyze the research results and the ways we use to communicate the findings postmodernity is the paradigm in which we are greatly concerned what is the place of rules of research research ethics selection of the problem and designing of research as we consider the context whereby nothing absolute can be envisaged how should one review the literature to suit this postmodern understanding of reality how should one argue his or her case this book is designed to help students in higher learning institutions learn qualitative research methods in classrooms or by themselves it moves students and researchers from modern ways of understanding doing and communicating qualitative research towards postmodern challenges and promises in this case the book is worthy reading to every serious student and researcher who seeks to equip oneself to the current issues of qualitative research methodology

the concept of the field is significant in ethnographic research as well as qualitative research methods more generally however how a field researcher enters the field is usually taken for granted after gaining access to the field we suggest that entrance is a distinct phase of fieldwork that differs from negotiating access entrance is not a trivial event rather it is a rite of passage into a complex practice world and marks a critical field moment drawing on our ethnography and insights from hermeneutics and anthropology we show that a practical understanding of the field represents a fusion of horizons where a fieldworker is thrown the concept of thrownness highlights the fact that the fieldworkers own historicity and prejudices affect their entrance into the field hence entrance into the field orientates an ethnographer in the field and influences the entire period of fieldwork that follows our theorizing is intended as a contribution towards advancing the discussion of qualitative research methods full paper available at doi org 10 1111 isj 12124
