this book argues that at the core of legal philosophy's principal debates there is essentially one issue: judicial impartiality. Keeping this issue to the forefront, Raban's approach sheds much light on many difficult and seemingly perplexing jurisprudential debates. Modern legal theory and judicial impartiality offers a fresh and penetrating examination of two of the most celebrated modern legal theorists: H.L.A. Hart and Ronald Dworkin. The book explains the relations between these two scholars and other theorists and schools of thought, including Max Weber, Lon Fuller, and the Law and Economics movement, offering both novices and experts an innovative and lucid look at modern legal theory. The book is written in an engaging and conversational style, tackling highly sophisticated issues in a concise and accessible manner. Undergraduates in jurisprudence and legal theory, as well as more advanced readers, will find it clear and challenging.

Globalization has led to growing labour fragmentation and widening of gaps in social protection. Although the enterprise is increasingly expected to be socially responsible, in actuality extreme worker inequalities and social dumping have become ubiquitous worldwide. This volume, the first to focus attention on the theory of the firm as it reveals itself in today's world from a multidisciplinary perspective, underscores the necessity to rebuild a new scientifically controlled paradigm that acknowledges and regulates the dimension of power in the functioning of the organization. In their contributed essays, nineteen renowned scholars in labour law and industrial relations rethink the firm: its conception, its value, and its regulation, analysing such aspects as the following: labour management relations; issues that arise when companies go global but workers remain local; the firm as a social construction; the continuing necessity for collective bargaining; concealment of the employment relationship under the guise of self-employment; concealment of the real employer behind figureheads and shell companies; social welfare effects of outsourcing; the company's interaction with the network of suppliers and with local education processes; determining who actually carries responsibility towards workers; overcoming companies' drive to enter the global market in response to national regulation; realizing the notion of duty of care; mechanisms of participation.
