Landscape Architecture Criticism offers techniques, perspectives and theories which relate to landscape architecture, a field very different from the more well-known domains of art and architectural criticism. Throughout the book, Bowring delves into questions such as: how do we know if built or unbuilt works of landscape architecture are successful? What strategies are used to measure the success or failure and by whom? Does design criticism only come in written form? It brings together diverse perspectives on criticism in landscape architecture, establishing a substantial point of reference for approaching design critique. Exploring how criticism developed within the discipline, beginning with an introductory overview to set the framework, the book then moves on to historical perspectives, the purpose of critique, theoretical positions ranging from aesthetics to politics and experience, unbuilt projects, techniques and communication, written for professionals and academics as well as for students and instructors in landscape architecture. It includes strategies, diagrams, matrices and full colour illustrations to prompt discussion and provide a basis for exploring design critique.

The past decade has been witness to a remarkable resurgence of interest in landscape, while this recovery invokes a return of past traditions and ideas, it also implies renewal, invention and transformation. Recovering Landscape collects a number of essays that discuss why landscape is gaining increased attention today and what new possibilities might emerge from this situation. Themes such as reclamation, urbanism, infrastructure, geometry, representation and temporality are explored in discussions drawn from recent developments, not only in the United States but also in the Netherlands, France, India and Southeast Asia. The contributors to this collection are all leading figures in the field of landscape architecture: Alan Balfour, Denis Cosgrove, Georges Descombes, Christophe Girot, Steen Hoyer, David Leatherbarrow, Bart Lootsma, Sébastien Marot, Anuradha Mathur, Marc Treib and Alex Wall.

This is the companion volume to the Routledge Handbook of Teaching Landscape in the two-part set initiated by the European Council of Landscape Architecture Schools. ECLAS design and planning studio as a form of teaching lies at the core of landscape architecture education. They can simulate a professional situation and promote the development of creative solutions based on gaining an understanding of a specific project site or planning area, address existing challenges in urban and rural landscapes and often involve interaction with real stakeholders such as municipality representatives, residents or activist groups. In this way, studio-based planning and design teaching brings students closer to everyday practice, helping to prepare them to create real-world problem-solving designs. This book provides fully illustrated examples of studios from over twenty different schools of landscape architecture worldwide, with over 250 full colour images. It is an essential resource for instructors and academics across the landscape discipline for the continuously evolving process of discussing and generating improved teaching modes in landscape architecture.
