solving complex optimization problems with parallel metaheuristics parallel  
 metaheuristics brings together an international group of experts in parallelism and  
 metaheuristics to provide a much needed synthesis of these two fields readers  
 discover how metaheuristic techniques can provide useful and practical solutions for a

wide range of problems and application domains with an emphasis on the fields of telecommunications and bioinformatics this volume fills a long existing gap allowing researchers and practitioners to develop efficient metaheuristic algorithms to find solutions the book is divided into three parts part one introduction to metaheuristics and parallelism including an introduction to metaheuristic techniques measuring the performance of parallel metaheuristics new technologies in parallelism and a head to head discussion on metaheuristics and parallelism part two parallel metaheuristic models including parallel genetic algorithms parallel genetic programming parallel evolution strategies parallel ant colony algorithms parallel estimation of distribution algorithms parallel scatter search parallel variable neighborhood search parallel simulated annealing parallel tabu search parallel grasp parallel hybrid metaheuristics parallel multi objective optimization and parallel heterogeneous metaheuristics part three theory and applications including theory of parallel genetic algorithms parallel metaheuristics applications parallel metaheuristics in telecommunications and a final chapter on bioinformatics and parallel metaheuristics each self contained chapter begins with clear overviews and introductions that bring the reader up to speed describes basic techniques and ends with a reference list for further study packed with numerous tables and figures to illustrate the complex theory and processes this comprehensive volume also includes numerous practical real world optimization problems and their solutions this is essential reading for students and researchers in computer science mathematics and engineering who deal with parallelism metaheuristics and optimization in general
