resistance 83 4 an internal focus for change 122 5 responding to painful feelings 158 6 familial and developmental factors 201 7 inflexible interpersonal coping strategies 242 8 interpersonal themes and patterns 278 9 an interpersonal solution 327 10 working through and termination 368

clinical child psychiatry third edition making a psychiatric diagnosis in children can be challenging some clinicians say the incidence of some childhood disorders such as bipolar disorder and adhd is over diagnosed while others say they are undiagnosed undertreated and are a large burden on society the drug treatment of child psychiatric disorders can also be controversial in children and adolescents this book fulfills the need for an objective clinically relevant source to dispel this confusion clinical child psychiatry is a textbook of current clinical practice in child and adolescent psychiatry it is designed as a reference for clinicians that is both easily usable and authoritative a chairside reference for the consultation room this book addresses a defined series of clinical entities that represent the bulk of current treatment modalities and disorders encountered in 21st century practice it is authoritative in the areas addressed while at the same time being rapidly accessible in format to facilitate access it presents disorders in declining order of frequency the authors believe that worthwhile clinical work must be informed by both evidence based practice and by psychiatry s traditional attention to internal and interpersonal dynamics they are committed to an approach that is broadly biopsychosocial while based on current clinical evidence for a pragmatic clinical focus the book is divided into four sections the first fundamentals of child and adolescent psychiatric practice addresses assessment treatment modalities and planning common child and adolescent psychiatric disorders and developmental disorders cover the diagnosis and treatment of the large majority of disease entities encountered in practice the final section special problems in child and adolescent psychiatry includes a variety of topics such as foster care and adoption loss and grief and forensics new evidence relating to the areas of depression psychosis trauma new insights from genetics genomics and proteomics cleverly integrated into chapters on the individual disease with focus on their clinical

application new chapter on consultation and collaboration within systems of care the book addresses a need for clinicians many of whom are beginners non psychiatrists or psychiatrists entering unfamiliar territory to come up to speed rapidly in providing more than perfunctory service to needy populations this challenge grows ever greater

the handbook takes the practitioner to the next stage with an overview of the key evidence based therapies with guidelines on further reading and training it also reviews key professional and organisational issues related to the delivery of services in resource limited situations

accompanying dvd roms contain more than three hours of video on techniques body mechanics and more plus anatomy and physiology animations that demonstrate concepts from the book page 4 of cover

there is no single cure for tinnitus and many clinicians are unaware of the wide range of tinnitus treatments available or are inexperienced in dealing with patients few treatments have been tested in controlled scientific investigations this book explains treatments that have some scientific basis or that are used by experienced clinicians
