it was just over 12 years ago that we first sat down together to talk about psychological traps in the relative

calm of late afternoons feet draped casually over the seedy furnishings of the tufts psychology department we entertained each other with personal anecdotes about old cars times spent lost on hold and the shakespearean concerns of rosenkrantz and guildenstern lord and lady macbeth and other notables eventually informed by our many illustrations and the excitement that their repeated telling engendered in the two of us we began to move more formally into trap analysis how do you know a trap when you see one what are the shared characteristics of all psychological traps regardless of origin scope or complexity what are the key conceptual elements in any effort to differentiate among the traps of the world what factors make us more or less apt to fall prey to entrapment these were some of the questions that arose during these initial meetings a series of weekly meetings stretched over the ensuing years interrupted temporarily by various exigencies and led eventually to a research program that grew to involve a number of students and faculty colleagues at the time of course we did not regard our work as a research program rather even as our experiments proceeded to answer two burning questions at a time they managed to raise three or four new issues that we had not anticipated before

the handbook of conflict resolution second edition is written for both the seasoned professional and the student who wants to deepen their understanding of the processes involved in conflicts and their knowledge of how to manage them constructively it provides the theoretical underpinnings that throw light on the fundamental social psychological processes involved in understanding and managing conflicts at all levels interpersonal intergroup organizational and international the handbook covers a broad range of topics including information on cooperation and competition justice trust development and repair resolving intractable conflict and working with culture and conflict comprehensive in scope this new edition includes chapters that deal with language emotion gender and personal implicit theories as they relate to conflict

this book provides a comprehensive interdisciplinary original and holistic analysis of the socio psychological dynamics of intractable conflicts daniel bar tal s analysis rests on the premise that intractable conflicts share certain socio psychological foundations despite differences in context and other characteristics he describes a full cycle of intractable conflicts their outbreak escalation and reconciliation through peace building

includes proceedings of the 54th 55th annual meetings of the association 1946 47 and proceedings of meetings of various regional psychological associations

conflict is inherent in virtually every aspect of human relations from sport to parliamentary democracy from fashion in the arts to paradigmatic challenges in the sciences and from economic activity to intimate relationships yet it can become among the most serious social problems humans face when it loses its

constructive features and becomes protracted over time with no obvious means of resolution this book addresses the subject of intractable social conflict from a new vantage point here these types of conflict represent self organizing phenomena emerging quite naturally from the ongoing dynamics in human interaction at any scale from the interpersonal to the international using the universal language and computational framework of nonlinear dynamical systems theory in combination with recent insights from social psychology intractable conflict is understood as a system locked in special attractor states that constrain the thoughts and actions of the parties to the conflict the emergence and maintenance of attractors for conflict can be described by means of formal models that incorporate the results of computer simulations experiments field research and archival analyses multi disciplinary research reflecting these approaches provides encouraging support for the dynamical systems perspective importantly this text presents new views on conflict resolution in contrast to traditional approaches that tend to focus on basic short lived cause effect relations the dynamical perspective emphasizes the temporal patterns and potential for emergence in destructive relations attractor deconstruction entails restoring complexity to a conflict scenario by isolating elements or changing the feedback loops among them the creation of a latent attractor trades on the tendency toward multi stability in dynamical systems and entails the consolidation of incongruent positive elements into a coherent structure in the bifurcation scenario factors are identified that can change the number and types of attractors in a conflict scenario the implementation of these strategies may hold the key to unlocking intractable conflict creating the potential for constructive social relations

social and political psychologists have attempted to reveal the reasons why individuals and societies that acknowledge that peace would improve their personal and collective well being and are aware of the required actions needed to promote it are simply incapable of making this step forward some social psychologists have advocated the idea that certain societal beliefs and collective memories about the nature

of the opponent the in group the history and the current state of the conflict distort the perceptions of society members and prevent them from identifying opportunities for peace but these cognitive barriers capture only part of the picture could identifying the role of discrete emotions in conflicts and conflict resolution potentially provide a wide platform for developing pinpoint conflict resolution interventions using a vast array of primary sources critical literature analysis and firsthand personal experiences in various conflict zones middle east cyprus bosnia and northern ireland eran halperin introduces a new perspective on psychological barriers to peace halperin focuses on various emotional mechanisms that hamper peace processes even when parties face real opportunities for conflict resolution more specifically he explores how hatred anger fear angst hope despair empathy guilt and shame combined with various emotion regulation strategies provide emotions based explanations for people s attitudinal and behavioral reactions to peace related events during the ongoing process of conflict resolution written in a clear and accessible style emotions in conflict offers a thought provoking and pioneering insight into the role discrete intergroup emotions play in impeding as well as facilitating peace processes in intractable conflicts this book is essential reading for those who study intractable conflicts and their resolutions and those who are interested in the real world implication of recent theories and findings on emotion and emotion regulation

originally published in 1966 the author challenges the accepted theories of group conflict of the time such as frustration and maladjustment for him conflict and its accompanying aggressiveness are features of interaction between groups and he supports this theory with a detailed experimental study of controlled groups at the time of publication dr otto klineberg director of the international centre for intergroup relations at the sorbonne wrote social scientists everywhere owe a great debt of gratitude to professor sherif the distinguished series of publications for which he and his co workers are responsible have an honoured place in our libraries in particular his contributions to the field of intergroup relations are outstanding his

concept of superordinate goals based on a combination of theoretical insight and brilliant experimentation has become a household word for those concerned with this significant problem in his new volume group conflict and co operation he carries his analysis much further not only describing the results of several original investigations but also building a theoretical appraisal of an extensive research literature the author has made still another significant contribution toward a better understanding of one of the most complex and disturbing phenomena of our time
