abordar un trabajo de estas características no deja de ser una tarea arriesgada y cuanto menos difícil pues no son muchas las referencias que existen sobre este tipo de actividades en el campo educativo también porque aunque hay muchos adeptos a ellas también nos enfrentamos con bastante agnosticos que cuestionan su viabilidad escolar nosotros somos optimistas y queremos serlo porque como dice el profesor Savater 1997 como educadores no nos queda más remedio que serlo nuestro compromiso es que ustedes también lo sean el trabajo que se va a presentar es fruto de un cuidadoso y madurado proceso de estudio y reflexión no exclusivo de la autora ya que a lo largo de este fructuoso y angosto camino hay múltiples contribuciones que han permitido abrir una pequeña puerta al inmenso campo sobre el que debemos avanzar las actividades en el medio natural de la escuela me estoy refiriendo a compañeros alumnos a grupos de trabajo seminarios cursos de formación etc a los que quiero agradecer sus inestimables aportaciones con la mirada atenta a los múltiples interrogantes que se abren cuando se cuestionan las posibilidades de emplear la naturaleza como espacio educativo especialmente desde la educación física surge la inspiración para construir la estructura del libro la primera parte del mismo dedicada a la conceptualización y fundamentación de las actividades en el medio natural en la escuela comienza con un breve repaso

histórico donde se van recogiendo los hitos más representativos de la educación contemporánea y el interés que ha despertado la naturaleza como espacio desde el cual abordar la educación como lugar contenido y filosofía cuestión que se desarrolla en el capítulo 1 17 las perspectivas con las que se tratan estas actividades desde lo escolar nos lleva a profundizar en el capítulo 2 sobre el significado que estas adquieren así como la influencia que ejercen distintos ámbitos social político cultural en su determinación y configuración como prácticas educativas la confluencia de estos discursos propician la aparición de un enfoque susceptible de camuflarse y enterrarse entre las funciones de una educación física poco educativa el capítulo 3 trata de responder utilizar el medio natural en la educación en general y en la educación física en particular aislando por un momento las incompatibilidades existentes desde las condiciones de la escuela actual tanto por ubicación como por usos y costumbres responsables de generar una cultura escolar alejada y aislada del mundo en el que está en el capítulo 4 con el que se cierra la primera parte trata de ampliar la perspectiva educativa de las actividades en el medio natural abordándolas desde su globalidad por las oportunidades que ofrece de establecer una red significativa de conocimientos y por fomentar una educación en valores necesaria para el crecimiento de una sociedad democrática la segunda parte trata la problemática que existe en la realidad sobre la inclusión de estas actividades en la escuela manifestándose en el abandono generalizado de las mismas en el capítulo 5 se reflexiona sobre sus posibilidades tomando como marco de referencia las condiciones escolares al tiempo que se intenta resolver ciertos conflictos y superar algunos mitos a continuación en el capítulo 6 nos centramos en responder cuestiones relativas a su puesta en práctica cobrando especial relevancia los aspectos legislativos cuyo conocimiento nos permiten asumirlas con menores riesgos e incertidumbres miedos asimismo se establecen los principios básicos sobre la planificación y organización de las actividades en el medio natural para cualquiera de sus ámbitos de aplicación formal escolar y no formal complementarias y extraescolares por último en el capítulo 7 hemos querido abrir un gran debate sobre el camino que ha de tomar la formación del maestro en relación a estas actividades cuestionando si esta ha de dirigirse hacia una especialización técnica o por el contrario debe adquirir una perspectiva más en consonancia con sus potencialidades educativas

this book is part of a six volume series on disaster risk reduction and resilience the series aims to fill in gaps in theory and practice in the sendai framework and provides additional resources methodologies and communication strategies to enhance the plan for action and targets proposed by the sendai framework the series will appeal to a broad range of researchers academics students policy makers and practitioners in engineering environmental science and geography geoscience emergency management finance community adaptation atmospheric science and information technology this volume offers indigenous approaches to disaster risk reduction community sustainability and climate change resilience as well as agro ecological innovations for improving resilience to climate change the focus is on adaptation strategies for sustainable terrestrial and marine ecosystems to reduce the impacts of anthropogenic factors that exacerbate disaster risk including hydro meteorological services for climate resilience food security measures in agriculture and livestock flood mitigation plans and increased climate change education and awareness the book concludes with three case studies in africa detailing the impacts of strengthened climate change resilience measures adaptive social protections and improved water availability through hydro electric technologies
