political elites are a key topic in contemporary china studies and have been investigated in relation to factional politics generation politics technocracy and crucially institutionalization the institutionalization of elite replacement began in china in the 1980s and quickly accelerated after the early 1990s as mechanisms emerged to regulate political elites entry and exit including age limits term limits and step by step promotion by examining the various processes of elite selection this book explores the role played by institutionalization in elite recruitment promotion and turnover in china while existing studies have developed our understanding of chinese elite politics two key puzzles regarding institutionalisation remain although institutionalisation is recognised as an important trend in chinese politics there is as yet no theoretical framework to explain the forces that have brought about and sustained this further it is unclear how the process of institutionalisation has impacted on factional politics and how factions would continue to operate within the parameters of formal politics drawing on a wide range of studies this book looks at politburo members senior people s liberation army officers provincial leaders heads of major central state owned enterprises and youth league affiliates to provide a comprehensive understanding of elite recruitment and mobility in contemporary china this book will be of great interests to students and scholars of chinese politics and government chinese studies and asian politics more broadly

china s political worldview and chinese exceptionalism international order and global leadership uses the notion of chinese exceptionalism as a framework to analyze china s international politics and foreign policy this book argues that china s approach to international relations is best understood in the context of these claims to exceptionalism and china s broader political world view in doing so it fosters a more comprehensive understanding of china s actions within the realms of foreign policy and international politics and in the context of the preferred world order norms and rules that the country seeks to promote focuses on the study of china s political worldview an area that is under studied by western scholars of chinese politics emphasizes on china s diplomatic activities in asia which is an area of great interest to policy makers study on chinese exceptionalism which is also an under researched albeit growing theme in recent years

faced with the usual list of paradoxes that plague our views of china it is a communist regime with a capitalist economy an authoritarian state with an entrepreneurial spirit a unified nation with tendencies toward fragmentation the contributions to this volume work to go beyond them and to seek new paths to understanding china to do so the essays avoid the conventional approaches toward chinese politics that focus on either evolutionist culturally bound or functionalist role bound issues rather than separate state from society these essays explore how the interweaving of these different spheres creates

a hazy border between them the contributors explore the moving frontiers between other spheres as well such as rural and urban populations internal evolution and external influence and money and politics this book does not aim to offer a new framework of analysis for understanding chinese politics but to open up new directions for research and study on the topic the internationally diverse scholars in this volume offer readers an intriguing look at the present and future of china research

a detailed case study of provincial politics during the decade long cultural revolution which analyzes the form and changing nature of mass organizations established in china by 1966 the text traces their evolution activities and ultimate dissolution ten years later
