can there be such a thing as spiritual science today should faith and spirit remain as purely private concerns or as traditionally preserves of the church when rudolf steiner founded anthroposophy in the early twentieth century his intention was to create a fundamentally scientific approach to the spirit his basic works detail methods for developing spiritual consciousness allowing the individual to replicate the results of his research this key aspect distinguishes anthroposophy from the wealth of spiritual teachings sects cults and religions within the modern cultural milieu but did steiner fail in his endeavour to build a scientific path to spiritual knowledge is anthroposophy just another theory based on intellectual thought to be analysed and dismissed up to now academia has largely ignored rudolf steiner s work in 2013 however the first volume of a new series a critical edition of rudolf steiner s writings edited by a professor of the largest religious university in the usa was published by a respected german academic press taking this

concrete case as an illustration pietro archiati argues that academia with its in built bias towards the atheistic assumptions of materialistic science will almost inevitably misrepresent steiner s work anthroposophy is a spiritual science whose metamorphosing nature requires penetration of its essence for true understanding presenting a broad exploration of the critical questions outlined above archiati s exposition works not only as a critique of a specific new edition of steiner s works but also as an introduction to key tenets of anthroposophical methodology and thought when in the case of a flower the coloured blossom appears this does not come as a correction of a faulty green leaf it is on the contrary a further metamorphosis of the plant which without the existence of the green leaf would not have been able to arise rudolf steiner was always comparing the arising of his spiritual science with the evolution of a living organism pietro archiati
