handbook of effective psychotherapy is the culmination of 15 years of personal interest in the area of psychotherapy outcome research in my view this is one of the most interesting and crucial areas in the field it has relevance across disparate clinical disciplines and orientations it provides a measure of how far the field has progressed in its efforts to improve the effectiveness of psychotherapeutic intervention and it provides an ongoing measure of how readily clinicians adapt to scientific indications in state of the art care regrettably as several of the chapters in this volume indicate there is a vast chasm between what is known about the best available treatments and what is applied as the usual standard of care on the most basic level there appears to be a significant number of clinicians who remain reluctant to acknowledge that scientific study can add to their ability to aid the emotionally distressed i hope that this handbook with its many delineations of empirically supported treatments will do something to remedy this state of affairs

this document is a practical guide to planning organizing training staff and implementing personal services in the event of a disaster the objectives of personal services are to arrange for the initial reception of disaster victims provide temporary care for unattended children and dependent elderly persons provide information on financial or material aid available and offer immediate and long term support to people with emotional problems and needs created or aggravated by a disaster

aims to provide a valuable reference for medical assisting that incorporates the full range of business and clinical activities encountered in the physician s office or in other outpatient medical settings
