why do states often refuse to yield to military threats from a more powerful actor such as the united states why do they frequently prefer war to compliance international relations scholars generally employ the rational choice logic of consequences or the constructivist logic of appropriateness to explain this puzzling behavior max weber however suggested a third logic of choice in his magnum opus economy and society human decision making can also be motivated by emotions drawing on weber and more recent scholarship in sociology and psychology robin markwica introduces the logic of affect or emotional choice theory into the field of international relations the logic of affect posits that actors behavior is shaped by the dynamic interplay among their norms identities and five key emotions fear anger hope pride and humiliation markwica puts forward a series of propositions that specify the affective conditions under which leaders are likely to accept or reject a coercer s demands to infer emotions and to examine their influence on decision making he develops a methodological strategy combining sentiment analysis and an interpretive form of process tracing he then applies the logic of affect to nikita khrushchev s behavior during the cuban missile crisis in 1962 and saddam hussein s decision making in the gulf conflict in 1990¹ offering a novel explanation for why u s coercive diplomacy succeeded in one case but not in the other

in his 2006 state of the union speech president george w bush asked the u s congress to prohibit the most egregious abuses of medical research such as the creation of animal human hybrids the president s message echoed that of a 2004 report by the president s council on bioethics which recommended that hybrid human animal embryos be banned by congress discussions of early interspecies research in which cells or dna are interchanged between humans and nonhumans at early stages of development can often devolve into sweeping statements colorful imagery and confusing policy although today s policy advisory groups are becoming more informed debate is still limited by the interchangeable use of terms such as chimeras and hybrids a tendency to treat all forms of interspecies alike the failure to distinguish between laboratory research and procreation and not enough serious policy justification andrea bonnickson seeks to understand reasons behind support of and disdain for interspecies research in such areas as chimerism hybridization interspecies nuclear transfer cross species embryo transfer and transgenics she highlights two claims critics make against early interspecies studies that the research will violate

human dignity and that it can lead to procreation are these claims sufficient to justify restrictive policy bonnickson carefully illustrates the challenges of making policy for sensitive and often sensationalized research research that touches deep seated values and that probes the boundary between human and nonhuman animals

the study of voting behaviour remains a vibrant sub discipline of political science the handbook of electoral behaviour is an authoritative and wide ranging survey of this dynamic field drawing together a team of the world s leading scholars to provide a state of the art review that sets the agenda for future study taking an interdisciplinary approach and focusing on a range of countries the handbook is composed of eight parts the first five cover the principal theoretical paradigms establishing the state of the art in their conceptualisation and application and followed by chapters on their specific challenges and innovative applications in contemporary voting studies the remaining three parts explore elements of the voting process to understand their different effects on vote outcomes the sage handbook of electoral behaviour is an essential benchmark publication for advanced students researchers and practitioners in the fields of politics sociology psychology and research methods

although the debate over same sex marriage in the united states has ended no one seems to know what lies on the horizon the conversation about what marriage could be like in the future is no longer confined to academics in his

dissent in obergefell chief justice roberts linked the constitutionally mandated legal recognition of same sex marriage to the possibility that states may also have to recognize multi person intimate relationships as well to avoid discriminating against plural marriage enthusiasts the popularity of television shows like tlc s sister wives and hbo s big love suggests that americans no longer can be dismissive of the possibility that in the foreseeable future marriage could and perhaps should look very different than it does today rather than settling the question of whether states ought to abolish marriage make it more inclusive contractual or call it something else this book exposes readers to some of the normative legal and empirical questions that americans must address before they can deliberate thoughtfully about whether to keep the marital status quo where monogamy remains privileged unlike much of the debate over same sex marriage they exchange reasons with one another as they discuss marital reform this book is for ordinary americans their elected representatives and judges to help them ultimately decide whether they want to continue to define marriage so narrowly make it more inclusive to avoid discrimination or have the state leave the marriage business this edited interdisciplinary volume contains eight original contributions all of which illuminate important but often neglected areas of the topic
