the goal of a high quality cost effective and accessible health care for patients is achieved through constructing a team based and patient centered health care delivery system the expanded role of pharmacists uplifts them to patient care from dispensing and manufacturing or marketing of

drugs along with doctors and allied health professionals pharmacists are increasingly recognized as an integral part of the patient care team furthermore colleges of pharmacy need to revise and update their curricula to accommodate the progressively increasing development in the pharmaceutical education and the evolving new roles of practicing pharmacists in patient care settings this book focuses on the expanded role of the pharmacists in total patient care including prescribing dispensing compounding administering and monitoring of drugs at home hospital community hospice critical care changeover and other care settings the sector is emerging in both developed and under developed countries overburdened by patient loads and the explosion of new drugs physicians turned to pharmacists more and more for drug information especially within institutional settings and today's patient care pharmacists are taking more interests in medication review and reconciliation patient education and counseling creating drug therapy regimen and monitoring compliance the purpose of this book is to guide the pharmacists in their daily interactions with patients and to ensure collaboration with other health professionals the contents are mostly based on recently published articles related to patient care with most recent ideas and activities followed by the patient care pharmacists around the globe however a pharmacist implements the care plan in collaboration with other health care professionals and the patient or caregiver along with professional guidelines the book discusses the concepts and best practices of patient interaction patient rights and ethical decision making for the professional pharmacist apprentice and student in every chapter the role of pharmacists in that chapter specific issues are detailed explicitly so that a professional pharmacist or a student can figure out his or her do's and don'ts in that specific situation moreover further reading references are listed as future recommendations so the book is an archive of potential references too among so many books about patient care either doctors or nurses roles are highlighted the proposed book highlights the pharmacists roles and responsibilities to the most separated from those of doctors and nurses with the most recent information obtained from most publications in several journals books bulletins newsletter magazines etc

the book presents a detailed description of brief existential psychotherapy (BEP) based on an articulated model integrating knowledge from existential psychotherapy, psychobiology of human stress, mind-body techniques and principles of positive psychiatry and psychology. BEP is conducted according to a pragmatic method centered on the view of one's existence, analysis and response to critical life stress events, designing a route of acceptance and search for meaning in life. BEP does not substitute other psychotherapies or their indications; it is born for the short-term treatment of crises after severe life stress events such as deaths of loved ones, losses, divorce, retirement, personal or collective emotional traumas, major violations of law and detention in jail, with a particular emphasis on severe somatic diseases, cancer, myocardial infarction, stroke, degenerative diseases and other subacute or chronic conditions that change life's perspective. The volume presents a methodology of BEP based on traditional clinical psychopathology with a first step of medical and psychopathological assessment establishing a categorical and a dimensional diagnosis; then subsequent steps are provided in a brief psychotherapy course with a more common format of 12-20 sessions, 1hr duration. The issues and aims of treatment are transversal across different psychiatric diagnoses, meaning the intervention follows similar activity lines independently from the specific categorical diagnosis. The intervention is dedicated to people with existential suffering without

psychopathological diagnosis too medical therapy and psychopharmacological treatment are given according to patient needs there is no preclusion toward the integration between psychotherapy and psychopharmacotherapy as well as other techniques with evidence of efficacy moreover in some cases appropriate psychopharmacotherapy consents to psychotherapy impossible otherwise this volume will be an invaluable tool for psychotherapists psychologists psychiatrists counselors social workers and other medical professionals
