millions of low income african americans in the united states lack access to health care how do they treat their health care problems in health care off the books danielle t raudenbush provides an answer that challenges public perceptions and prior scholarly work informed by three and a half years of fieldwork in a public housing development raudenbush shows how

residents who face obstacles to health care gain access to pharmaceutical drugs medical equipment physician reference manuals and insurance cards by mobilizing social networks that include not only their neighbors but also local physicians however membership in these social networks is not universal and some residents are forced to turn to a robust street market to obtain medicine for others health problems simply go untreated raudenbush reconceptualizes u s health care as a formal informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems while the practices described in the book may at times be beneficial to people s health they also have the potential to do serious harm by understanding this hybrid system we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes

healthcare decision makers in search of reliable information that compares health interventions increasingly turn to systematic reviews for the best summary of the evidence systematic reviews identify select assess and synthesize the findings of similar but separate studies and can help clarify what is known and not known about the potential benefits and harms of drugs devices and other healthcare services systematic reviews can be helpful for clinicians who want to integrate research findings into their daily practices for patients to make well informed choices about their own care for professional medical societies and other organizations that develop clinical practice guidelines too often systematic reviews are of uncertain or poor quality there are no universally accepted standards for developing systematic reviews leading to variability in how conflicts of interest and biases are handled how evidence is appraised and the overall scientific rigor of the process in finding what works in health care the institute of medicine iom recommends 21 standards for developing high quality systematic reviews of comparative effectiveness research the standards address the entire systematic review process from the initial steps of formulating the topic and building the review team to producing a detailed final report that synthesizes what the evidence shows and where knowledge gaps remain finding what works in health care also proposes a framework for improving the quality of the science underpinning systematic reviews this book will serve as a vital resource for both sponsors and producers of systematic reviews of comparative effectiveness research

learns to be a manager in a classroom or from a book but books that take this disclaimer as their starting point are indispensable. Walshe and Smith and their fellow authors invite their audience: healthcare managers, healthcare policy makers, and postgraduate students taking courses in healthcare management to critically combine experiential learning with academic learning and to acquire knowledge from both practice and theory by doing so. They have found the third way between the advocates of evidence-based management and their critics. Dr. Jan Kees Helderman, Associate Professor in Public Administration, Institute for Management Research, Radboud University Nijmegen, The Netherlands.
