relevant timely and approachable california indians and their environment is an instant classic that should be invaluable for anyone interested in california s diverse natural and cultural landscapes and the future sustainability of the state torben rick author of human impacts on ancient marine ecosystems a global perspective california indians and their environment stands respectfully on the shoulders of scholarly giants and demonstrates the cumulative power of cultural historical and scientific research it is a remarkably inclusive and relevant text that is both highly informative of past indigenous life ways and identities and strikingly insightful into current environmental crises that confront us all seth mallios author of the deadly politics of giving exchange and violence at ajacan roanoke and jamestown in this highly readable and insightful book lightfoot and parrish show how the natural diversity of california not

only influenced the contours of Indian lifeways but was indeed augmented by burning and other practices that were used to sustain indigenous economies the ingenuity and skill with which California Indians managed and used natural resources underscores the need to infuse modern land use policy with the knowledge of people whose ecological experiences in North America eclipse those of Euroamericans by a factor of forty Kenneth E. Sassaman author of People of the Shoals Stallings Culture of the Savannah River Valley this book is a deeply informative and fascinating examination of California Indians rich and complex relationship with the ecological landscape Lightfoot and Parrish have thoroughly updated the classic book The Natural World of the California Indians with critical analysis of anthropological theory and methods and incorporation of indigenous knowledge and practices it is a lucid accessible book that tells an intriguing story for our modern times Melissa K. Nelson San Francisco State University and president of the Cultural Conservancy at once scholarly and accessible this book is destined to be a classic framed around pressing environmental issues of concern to a broad range of Californians today Lightfoot and Parrish provide an historical ecology of California's amazingly diverse environments its biological resources and the native peoples who both adapted to and actively managed them Jon M. Erlandson author of Early Hunter Gatherers of the California Coast California Indians and their Environment fills a significant gap in our understanding of the first peoples of California Lightfoot and Parrish take on the daunting task of synthesizing and expanding on our knowledge of indigenous land management practices sustainable economies and the use of natural resources for food medicine and technological needs this innovative and thought provoking book is highly recommended to anyone who wants to learn more about the diverse traditions of California Indians Lynn Gamble author of The Chumash World at European Contact this innovative book moves understanding of the native peoples of California from the past to the future the authors insight into native Californians as fire managers is an eye opener to interpreting the ecological and cultural uniqueness of the region Lightfoot and Parrish have provided the best introduction to native California while at the same time advancing the best scholarship with an original synthesis a rare feat William Simmons Brown University

moving across space and time from prehistory to the present and around the world this fascinating volume explores the many ways in which the earth has been transformed by human effort in discerning text more than 150 fabulous photographs many of them taken by some of the world's premier aerial photographers and 21 arresting drawings paintings and other artworks Designing the Earth examines such diverse works as clay dwellings in Chad and Mali

adobe pueblos in the american southwest mud brick ziggurats in babylon ancient egyptian funerary monuments subterranean aqueducts in iran native american effigy mounds the nazca lines of peru artificial islands in japan the great wall of china mount rushmore and earth sheltered housing by frank lloyd wright as well as earthworks by contemporary artists such as michael heizer and andy goldsworthy by considering the works in a larger design context and by discussing their meaning import and use author david bourdon opens the reader s eyes to the formal and functional characteristics of earthworks around the world as he explores how people on different continents unknown to each other demonstrated remarkable similarities in the recontouring of their landscapes
