engaging innovative and insightful cases in this book addressing andragogical practices in the contemporary society

beyond providing space for data science activities academic libraries are often overlooked in the data science landscape that is emerging at academic research institutions although some academic libraries are collaborating in specific ways in a small subset of institutions there is much untapped potential for developing partnerships as library and information science roles continue to evolve to be more data centric and interdisciplinary and as research using a variety of data types continues to proliferate it is imperative to further explore the dynamics between libraries and the data science ecosystems in which they are a part the handbook of research on academic libraries as partners in data science ecosystems provides a global perspective on current and future trends concerning the integration of data science in libraries it provides both a foundational base of knowledge around data science and explores numerous ways academicians can reskill their staff engage in the research enterprise contribute to curriculum development and help build a stronger ecosystem where libraries are part of data science covering topics such as data science initiatives digital humanities and student engagement this book is an indispensable resource for librarians information professionals academic institutions researchers academic libraries and academicians

this handbook addresses the multifaceted roles of stem faculty focusing on professional development to support their teaching research and leadership responsibilities it explores faculty development planning techniques and outcomes highlighting barriers effective models and the impact on higher education practices

this volume encourages reflection on previous volumes family involvement has been an issue in early education

going back to pestalozzi almost two centuries ago this book looks at what advances in the area of family involvement in early education have been made since the publication of the previous volume

research demonstrates that stem disciplines perpetuate a history of exclusion particularly for students with marginalized identities this poses problems particularly when science permeates every aspect of contemporary american life institutions repeated failures to disrupt systemic oppression in stem has led to a mostly white cisgender and male scientific workforce replete with implicit and or explicit biases education holds one pathway to disrupt systemic linkages of stem oppression from society to the classroom maintaining views on science as inherently objective isolates it from the world in which it is performed stem education must move beyond the transactional approaches to transformative environments manifesting respect for students social and educational capital we must create a stem environment in which students with marginalized identities feel respected listened to and valued we must assist students in understanding how their positionality privilege and power both historically and currently impacts their meaning making and understanding of stem

the interdisciplinary future of engineering education discusses the current state of engineering education and addresses the daily challenges of those working in this sector the topics of how to do a better job of teaching a specific audience how to facilitate learning and how to prepare students for their future careers are extensively covered and innovative solutions are proposed throughout this unique book brings together a breadth of expertise attested by the broad backgrounds of the experts and educational practitioners contributing to this volume to lay the foundations for the future direction with the improvement of education of engineers in mind this collaborative effort by a group of uniquely placed educational practitioners provides guidance on the status of current engineering education and lays the foundations for its future direction the reasons why we teach

what we teach how we teach when we teach where we teach and who teaches are all re examined in a new light and ideas and solutions are proposed and evidentially supported the book sets out ideas for the need to develop a systemic and interdisciplinary approach to the education of future engineers on a model of student based learning this book will be of great interest to academics and educational researchers in the fields of engineering education and higher education it will also appeal to higher education policymakers educators and university teachers
