one of hegel s most controversial and confounding claims is that the real is rational and the rational is real in this book one of the world s leading scholars of hegel jean françois kervégan offers a thorough analysis and explanation of that claim along the way

delivering a compelling account of modern social political and ethical life kervégan begins with hegel s term objective spirit the public manifestation of our deepest commitments the binding norms that shape our existence as subjects and agents he examines objective spirit in three realms the notion of right the theory of society and the state in conversation with toqueville and other theorists of democracy whether in the anglophone world or in europe kervégan shows how hegel often associated with grand metaphysical ideas actually had a specific conception of civil society and the state in hegel s view public institutions represent the fulfillment of deep subjective needs and in that sense demonstrate that the real is the rational because what surrounds us is the product of our collective mindedness this groundbreaking analysis will guide the study of hegel and nineteenth century political thought for years to come
