do your readers know what a sanitation worker does beginning readers will learn about this job while examining color photographs that reinforce the simple text

this book proposes regenerative sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems the preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sani solutions it also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource

recovery and reuse rather than just amelioration it explores the contributions to food security livelihood support urban regeneration rural development and even local economies a new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented in addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions all of which culminates in a strategic and practical application platform called sanitation 4.0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation regenerative sanitation a new paradigm for sanitation 4.0 is inter and trans disciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions it includes relevant case studies examples exercise and future research recommendations it is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals

resilient water services and systems the foundation of well being provides an overarching framework on water and sanitation services and how they are coping with resilience aging infrastructure and climate change the editors present conceptual evidence about resilience backed by case studies that demonstrate resilience in practice there are 13 case studies from asia africa europe and north and south america providing informative perspectives from around the world this is a timely collection of historic and contemporary evidence that will have increasing relevance in the coming decades this volume will be of relevance to both scholars and practitioners resilient water services are the key to water security across the world sustaining them is a challenging task in high income countries where aging infrastructure is a critical issue and in low income countries where new infrastructure is needed and ability to pay is a more formidable barrier to success the editors have compiled a succinct analysis and assembled case studies that cover diverse regions and contexts from this book the reader will gain a wealth of knowledge about water services as well as rich vicarious experiences from the cases

the research project cuvewaters developed and implemented adapted technologies and accompanying measures to support the national process towards an integrated water resources management iwrms the aim is to give people in the cuvelai etosha basin reliable access to clean water over the long term thus enhancing their livelihood and health and to create job opportunities iwrms relies on solutions that use various sources types and qualities of water for different purposes cuvewaters implemented pilot plants for rain and floodwater harvesting groundwater desalination as well as facilities for sanitation and water reuse technical components of the project were framed by societal and scientific components integrated water resources management in water scarce regions provides a comprehensive view on the complexity and interconnectedness of findings and conclusions regarding the principle strategic approach within the cuvewaters project s concept the book aims to present the work of technical social and natural scientists but also of media professionals it gives thematically focussed details on

the three technology based solutions which go beyond mere technical considerations and embed this into the overarching process towards iwrms in Namibia finally it critically addresses lessons learnt and limits of projects in the context of research for implementation this book is of great value to experts professionals and also students and academics in the areas of water management technology development and implementation and transdisciplinary science

the importance of small towns is gaining increased recognition as a result of two developments the first development concerns the possible role of small towns in migration flows and urbanization development of small towns in the form of improved basic services and other amenities has been promoted in order to abate the impact of urbanization on large urban centres and to alleviate service provision pressures in major urban centers whilst stimulating rural economies and eventually prompting social transformations the second development concerns the targets set by the SDGs in 2015 SDG6 requires countries to ensure universal and equitable water services by 2030 this inclusive target requires that the water services needs of small towns are considered in the expansion of sustainable and equitable water services this book aims to contribute to the study of water services in small towns by critically examining different approaches and experiences of water supply in small towns it brings together empirical testimonies of how the implementation of reductionist models and the perseverance of certain principles underlying these models in the water sector have yielded suboptimal results much remains to be done before achieving universal service coverage in small towns is likely in order to do that we should start speaking of small towns as a category on their own and continue the work in elaborating further what these are and how they work in focus a book series that showcases the latest accomplishments in water research each book focuses on a specialist area with papers from top experts in the field it aims to be a vehicle for in depth understanding and inspire further conversations in the sector
