a disconnect between the educational requirements of secondary institutions and postsecondary institutions often results in a large percentage of first year college students requiring remediation moss bordelon 2007 as such postsecondary institutions administer tests to incoming students for placement into courses of the appropriate difficulty level however research on the efficacy of placement testing has revealed mixed results accordingly the purpose of this study was to meta analyze a large sample of accuplacer placement studies in order to estimate its true validity of

placement decisions by correcting for statistical artifacts data included all accuplacer placement validity studies completed through the admitted class evaluation service aces between 2001 and 2006 forty seven studies were examined which comprised data from 17 unique institutions when course success was defined as obtaining a grade of b or higher the average sample size weighted observed correlation between test scores and course success was 0.28 and when course success was defined as obtaining a grade of c or higher the average sample size weighted observed correlation was 0.24 after statistical artifacts were corrected those estimates increased to 0.47 and 0.38 respectively furthermore when these cut scores were applied the percentage of students that were placed correctly ranged from 58 to 84 percent across accuplacer tests overall results indicated a moderate to strong relationship between accuplacer scores and course success demonstrating that accuplacer test scores provide utility in terms of placing students into courses in which they are likely to succeed

this two volume set contains over 250 articles of varying lengths dealing with all aspects of human intelligence

making education and career connections
