this book gives an introduction to main ideas used in the physics of ultra relativistic
 heavy ion collisions the links between basic theoretical concepts discussed gradually
 from the elementary to more advanced level and the results of experiments are outlined
 so that experimentalists may learn more about the foundations of the models used by
 them to fit and interpret the data while theoreticians may learn more about how different
 theoretical ideas are used in practical applications the main task of the book is to collect
 the available information and establish a uniform picture of ultra relativistic heavy ion
 collisions the properties of hot and dense matter implied by this picture are discussed
 comprehensively in particular the issues concerning the formation of the quark gluon
 plasma in present and future heavy ion experiments are addressed

the ultimate handbook on microwave circuit design with cad full of tips and insights from
 seasoned industry veterans microwave circuit design offers practical proven advice on
 improving the design quality of microwave passive and active circuits while cutting costs
 and time covering all levels of microwave circuit design from the elementary to the very
 advanced the book systematically presents computer aided methods for linear and
 nonlinear designs used in the design and manufacture of microwave amplifiers
 oscillators and mixers using the newest cad tools the book shows how to design
 transistor and diode circuits and also details cad s usefulness in microwave integrated
 circuit mic and monolithic microwave integrated circuit mmic technology applications of
 nonlinear spice programs now available for microwave cad are described state of the art
 coverage includes microwave transistors hemts modfets mesfets hbts and more high
 power amplifier design oscillator design including feedback topologies phase noise and
 examples and more the techniques presented are illustrated with several mmic designs
 including a wideband amplifier a low noise amplifier and an mmic mixer this unique one
 stop handbook also features a major case study of an actual anticollision radar
 transceiver which is compared in detail against cad predictions examples of actual circuit
 designs with photographs of completed circuits and tables of design formulae
