this complete and coherent exposition complemented by numerous illustrative examples offers readers a text that can teach by itself fully rigorous in its treatment it offers a mathematically sound sequencing of topics the work starts with the most basic laws of matrix algebra and progresses to the sweep out process for obtaining the complete solution of any given system of linear equations homogeneous or nonhomogeneous and the role of matrix algebra in the presentation of useful geometric ideas techniques and terminology other subjects include the complete treatment of the structure of the solution space of a system of linear equations the most commonly used properties of determinants and linear operators and linear transformations of coordinates considerably more material than can be offered in a one semester course appears here this comprehensive volume by franz e hohn professor of mathematics at the university of illinois for many years provides instructors with a wide range of choices in order to meet differing interests and to accommodate students with varying backgrounds

this book is intended to be a complement to a traditional linear algebra textbook the entire book is devoted to the methods procedures algorithms and recipes for solving the computational numerical exercises that are generally asked of students in an elementary linear algebra course you will find within these pages over 100 such procedures and methods each described in simple language and illustrated with

multiple examples over 200 in all the procedures run the gamut from methods for solving systems of linear equations inverting matrices finding bases of subspaces in  $\mathbb{R}^n$  to computing coordinate vectors in abstract vector spaces determining the matrix of a linear transformation and computing eigenvalues and eigenvectors of linear operators and much more for ease of use and in the interest of making it self contained each section begins with a review of those definitions needed to understand the questions and the procedures that answer them
