billy's ongoing after death communications take his sister on an unprecedented journey into the bliss and wonder of life beyond death

das mutige Zeugnis: es gibt ein Leben nach dem Tod. Annie Kagan hat sich nie besonders für spirituelle Fragen interessiert, doch als ihr Bruder Billy stirbt, nimmt ihr Leben eine dramatische Wendung. Zwei Wochen nach seinem Tod erhält Annie plötzlich Nachricht von Billy aus dem Jenseits. Als sie schon befürchtet verrückt geworden zu sein, liefert Billy eindeutige Beweise für die Echtheit seiner Botschaften. Das zweite Leben des Billy Fingers ist eine der detailliertesten Nach-Tod-Kommunikationen, die je dokumentiert wurden. Billys lebendiger Bericht seiner Reise durch die Geheimnisse des Todes verändert nachhaltig unseren Blick auf das Leben, den Tod und unseren Platz im Universum.

An exploration into consciousness, the universe, and the nature of reality draws on transdimensional physics and biology, reincarnation, and past life memories. Animal consciousness, multiple identities, thoughtforms, soul pictures, and paranormal phenomena like crop circles and poltergeists explore the riddle of personal identity and how it differs from consciousness. It reveals that consciousness is more than encompassing all that exists; it also

speaks to what has yet to manifest scientific orthodoxy views the universe as conceived of matter protons neutrons electrons down to the smallest particle quarks but when you keep digging what is beneath quarks the scientific worldview does not take into account consciousness or life itself how did consciousness become part of the material universe is it a by product of brain chemistry or a constituent of reality or to dig deeper which is more fundamental the existence of an objective physical universe or our subjective experience of it in this investigation into consciousness the universe and the nature of reality richard grossinger offers a wide ranging foundation for reimagining the universe as based in consciousness rather than matter he presents in depth analysis of the standard scientific description of the universe revealing the holes in its theories exploring the interpenetration of matter and all reality by consciousness the author looks at reincarnation and past life memories examining famous and lesser known but verifiable accounts he then explores the nature and origin of consciousness with accompanying explorations of animal consciousness the brain as a computer multiple identities thoughtforms soul pictures and paranormal phenomena like ufos faeries and poltergeists he also examines concepts from physics that combine elements of both consciousness and matter such as collapsing waveforms and the uncertainty principle of quantum mechanics examining nonlocal and transpersonal modes of consciousness grossinger looks at the difference between consciousness and personal identity he expands this discussion with reflections on sethian cosmology using seth s own words and jane roberts s and john friedlander s interpretations he reveals that consciousness also encompasses what has yet to manifest and explains why the universe exists at all why there is something rather than nothing skewering the materialist paradigm and placing consciousness alongside mass gravity and heat as an essential component of the universe grossinger proposes that reality is a thoughtform where sentient beings collaborate to bring about a concrete realm vibrating at their own frequency
