the growth paradigm or the economic growth generally been presented as a positive limitless and good for social problems the term was hardly touched in pre capitalism by any academic research with the rise of capitalism and industrial revolution it became an important tool to measure production quantitatively and qualitatively industrialisation also encouraged the expansion of trade and gradual breakdown of the pre capitalist order in 18th century in britain the spread of market had facilitated the specialisation encouraging division of labour whilst for the classical political economists adam smith david ricardo and thomas malthus economic growth is self reinforcing marx pointed out importance of forces and relations of production and significance of social classes within it marx 1863 smith ricardo and malthus were writing at a time when capitalist development was expanding fast and growth was a central in the process the gradual impact of the west on the rest of world became part of a wider process of change in the world economy european capital increased its domination of the world trade through expansionist commercial policies wallerstein 1979 the economic growth encouraged commerce the necessity to export and other technological changes formed part of the reason for the decline of feudalism this transition from feudalism to capitalism began in the west and soon made an impact on the rest of the world t farhang morady hakan kapucu Ömer yalçınkaya development growth economic impacts of globalization 12 in 1932 simon kuznets the us economist identified gross domestic product gdp to measure the national output of a country within a period it has continued to be an important indicator to measure economic growth but it has also been under considerable criticisms for example gdp treats resources as income without excluding depletion or depression of the resources moreover gdp has been criticised for disregarding income distribution despite all the criticism gdp has been the most significant indicator of growth and development with the post war ii reconstruction of devastated countries and in order to kick start the world economy the state in both developed and developing counties became the important agency to facilitate economic growth the establishment of the bretton woods
