thomas aquinas has long been understood to have reconciled faith and reason typically he is understood as having provided justification for faith by means of proof particularly that the five ways prove the existence of god under this interpretation faith becomes a species of justified belief and the justification for faith rests upon the success of the five ways or alternatively on the success of other justificatory evidence in this book creighton rosental argues that aquinas s account of faith is not one of justified belief at least as it is understood in contemporary philosophy instead rosental argues faith has its own basis for epistemic reasonableness a reasonableness that does not derive from ordinary evidence or proof rather than requiring evidence accessible to the natural light of reason aquinas holds that faith has its own sort of evidence that which results from the light of faith aquinas aristotelianizes faith and argues that faith has the aristotelian epistemic virtue of certitude and in so doing reconciles faith and aristotelian reason at least as aristotle was understood by medieval philosophers this

reconciliation resolves important tensions between aristotelian science and christian doctrine further rosental examines three contemporary accounts of what counts as an epistemically responsible belief namely justified belief practical rationality and warrant and argue that under aquinas s account faith should be counted as rational and in an important though modified sense as justified rosental s book is an erudite and accessible reading of this most fundamental issue in thomistic studies

bound for beatitude is about st thomas aquinas s theology of beatitude and the journey thereto consequently the work s topic is the meaning and purpose of human life embedded in that of the whole cosmos this study is not an antiquarian exercise in the thought of some sundry medieval thinker but an exercise of ressourcement in the philosophical and theological wisdom of one of the most profound theologians of the catholic church one whom the church has canonized granted the title doctor of the church and for a long time regarded as the common doctor this exercise of ressourcement takes its methodological cues from the common doctor hence it is an integrated exercise of philosophical dogmatic and moral theology its specific theological topic the ultimate human end perfect happiness beatitude and the journey thereto stands at the very heart of st thomas s theology far from being passé his theology of beatitude is of urgent pertinence as the crisis of humanity and of creation and the exile of god seems to approach its apogee by way of a presentation interpretation and defense of thomas aquinas s doctrine of beatitude and the journey thereto bound for beatitude advances an argument based on four theses 1 the loss of a theology of beatitude has greatly impoverished contemporary theology in order to succeed and flourish theology must recover a sound teleological orientation 2 in order to recover a sound teleological orientation theology must recover metaphysics as its privileged instrument 3 thomas aquinas provides a still pertinent model for how theology might achieve these goals in a metaphysically profound theology of beatitude and the beatific vision finally 4 aquinas s rich and sophisticated account of the virtues charts the journey to beatitude in a way that still has analytic force and striking relevance in the early twenty first century

this dogmatic study addresses two perennial questions first how do we reconcile god s sovereignty with human freedom not just in general but particularly with respect to the church s full understanding of god s plan of salvation as a work of grace second and equally crucial is the question of how we reconcile god s universal salvific will with the mystery of predestination election and reprobation the author of this study does theology within the normative tradition of confessional catholicism and thus in the light of catholic teaching but this study is also an ecumenical work indeed a work in receptive ecumenism and hence he listens attentively to the reflections and arguments not only of his fellow catholic theologians matthias joseph scheeben and hans urs von balthasar but also theologians of the evangelical and reformed traditions john calvin herman bavinck karl barth and g c berkouwer this book concludes with a catholic synthesis regarding the doctrine of divine election in dogmatic and ecumenical perspective

conventional wisdom has it that thinking on nature and grace among roman catholic intellectuals between the sixteenth century and the eve of vatican ii was severely clouded by

the work of cajetan and his fellow thomistic commentators henri de lubachas rightly been given credit for pointing this out and to all appearances de lubac's influence won the day as can be seen by the imprint of his thought upon not just the second vatican council but also the pontificates of john paul ii and benedict xvi in recent years however a new crop of thomistic scholars has arisen who question whether de lubac's word on nature and grace should be the last hence the debate over the nature grace relation so heated in the mid twentieth century has been stirred once again andrew dean swafford here offers a third way by way of the nineteenth century german theologian matthias j scheeben who has been neglected in academic appraisals of the subject until now swafford shows that scheeben captures the very best of both sides while at the same time avoiding the characteristic pitfalls so often alleged against each

for renowned nineteenth century german dogmatic theologian matthias scheeben the divinely instituted liturgical cult of the old testament is replete with soteriological import figuratively signifying not only christ's saving work and the sacramental worship of the new testament but also the transformation and elevation of the rational creature by divine grace scheeben's distinctive use of sacrificial concepts is rooted in his underlying view of sacrifice as primarily perfective directed to the glorification of god and constituted by the conversion of the offering into a pleasing and acceptable aroma via ritual burning with god given fire in christ and the altar fire david augustine offers an in depth study of scheeben's soteriology of sacrifice providing a comprehensive analysis of his theology of sacrifice as well as a detailed examination of his sacrificial construal of christ's person his saving work and its application to others at the heart of this account is scheeben's understanding of christ's sacrifice as encompassing his entire paschal mystery passion death resurrection and ascension itself a passage of glorification that serves as the site and source of deifying and latreutic nuptial union as he shows scheeben employs the altar fire typology to establish a unity of cross and glory that fully maintains the atoning and meritorious significance of christ's saving death displaying careful attentiveness to scheeben's historical context and to the contours of his substantial corpus augustine also brings scheeben's biblically inflected dogmatic theology into dialogue with contemporary biblical and theological scholarship showcasing the enduring relevance of his thought

finding themselves in a protestant nation with little interest and less respect for catholic habits of mind often the sons and daughters of immigrants who had no training in the intellectual life of their native cultures catholics found themselves challenged to show one could be both catholic and american the result was one that appleby byrne and portier see as a work of creative fidelity in this book the editors offer the reader a chance to see what catholics from the earliest days to the present grappled with that task in the process we gain insight into such questions as is there or even ought there be a distinctively catholic intellectual style how can catholics best bring their insights into the nature and shape of the common weal into the public forum to influence debates some texts will seem quaint others though take on immense relevance as one comes to understand the relative poverty of secular ethics in coming to grips

with many of the truly great issues that matter most to how a nation ought to live its life texts from figures as different as thomas merton and john carroll orestes brownson and john courtney murray illuminate the landscape of american catholic intellectual life this book is absolutely important for college courses on catholic life and history but it will also be fascinating reading for the general reader who wants to understand how the catholic people made themselves a richly furnished intellectual home in an often hostile land
