the essential design companion now in an up to date new edition for architects drawing is more than a convenient way to communicate ideas it is an integral part of the creative process that has a profound impact on thinking and problem solving in graphic thinking for architects and designers third edition paul laseau demonstrates that more versatile and facile sketching leads to more flexible creative approaches to design challenges to encourage this flexibility and stimulate graphic thinking he introduces numerous graphic techniques that can be applied in a variety of situations he also helps readers acquire a solid grasp of basic freehand drawing representational drawing construction graphic note taking and diagramming important features of this new edition include easy to understand discussions supported by

freehand illustrations a new format with superior representation of techniques and concepts dozens of new and updated illustrations extensive coverage of new technologies related to the graphic thinking process for architects and students who want to maximize their creativity graphic thinking for architects and designers is a valuable tool in the pursuit of architectural solutions to contemporary design problems

architects today must position themselves within an extremely wide ranging field of qualifications this makes it all the more important to have a fresh introduction to the field that makes up one of their core competences the field of design this introductory presentation describes and analyzes the theories strategies and tools of creative design for the purposes of practical work with thoughtfulness and expertise it opens the reader s eyes to the processes that underlie design and demonstrates different ways of communicating about complex design work the first section focuses on the much discussed relationship between design and research between architecture and the sciences the second section describes basic design approaches from vitruvius and alberti through erwin panofsky and wolfgang kemp to otl aicher and vilém flusser the third and largest section presents the elementary tools of design from gestures and words through drawings models and simulations to critique all as instruments of creative design in architecture and its related fields

recording your ideas and observations primarily in pictures instead of words can help you become more creative and constructive on the job no matter what your level of artistic ability this show by example sourcebook clearly illustrates proven methods and procedures for keeping a highly useful visual notebook visual notes for architects and designers demonstrates how to make rapid notational sketches that serve as visual records for future reference as well as improve understanding and facilitate the development of ideas it shows you how to expand your knowledge of a subject beyond what is gained through observation or verbal representation alone you gain access to simple techniques for collecting analyzing and applying information crowe and laseau examine the relationship between note taking visualization and creativity they give practical guidance on how to develop visual acuity the ability to see more in what you experience visual literacy expressing yourself clearly and accurately with sketches graphic analysis using sketches to analyze observations numerous examples demonstrate some of the many uses of visual notes they help you develop a keener awareness of environments solve design problems and even get more out of lectures and presentations the authors also discuss types of notebooks suitable for taking visual notes if you want to develop your perceptual and creative skills to their utmost you will want to follow the strategies outlined in visual notes for architects and designers it is a valuable

guide for architects landscape architects designers and anyone interested in recording experience in sketch form

a welcome and timely addition to the subject of school design at a time of great change professor alan jones president of the royal institute of british architects comprehensive but also very practical approach andreas schleicher director for the directorate of education and skills in paris france any community building a new school should read this book michael b horn clayton christensen institute for disruptive innovation in boston usa builds a bridge from the simple to the extraordinary awash in opportunity and inspiration professor stephen heppell chair in learning innovation at the universidad camilo jose cela in madrid spain can school design help us to realize a new vision for education that equips young people for life in a fast changing world this is the big question at the heart of planning learning spaces a new guide for anyone involved in the planning and design of learning environments murray hudson and terry white have brought together educators and innovative school architects to pool their collective expertise and inspire the design of more intelligent learning spaces the authors prompt readers to question common assumptions about how schools should look and how children should be educated why have so many schools changed relatively little in more than a century what form should a school library take in the internet age do classrooms really have to be square the book also tackles vital elements of learning space design such as the right lighting heating and acoustics and explores the key role of furniture fixtures and fittings with contributions from leading professionals around the world including herman hertzberger and sir ken robinson planning learning spaces is an invaluable resource for architects interior designers and educators hoping that their project will make a genuine difference highly recommended reading for anyone involved with the process of building or updating an educational space

designing interior spaces is a task that is equally relevant as architecture landscape architecture and urban design for those working professionally in the built environment in this comprehensive work an international and interdisciplinary team of authors presents the essential aspects of the various fields of contemporary interior architecture and design the project examples are illustrated with brilliant photographs and plans they have been selected according to consistent criteria for all chapters of the book and represent the essential building types including exhibition stand design as well as a broad range of today s design approaches the authors place the collaboration between the various design disciplines at the center of focus the appendix contains information for further research all in all designing interior architecture is a fundamental reference work for all those professionally engaged with the design

developing your design process is your primary source for acquiring knowledge of how and why you design it will help you understand how architects think as well as learn why you should educate yourself about design culture you'll explore the spark of imagination that leads to a strong concept realize the importance of sketching and rough drafts focus your original concept to make your abstract idea visible and finally step away for a moment to critically question your concept by identifying its strengths and weaknesses you'll also be introduced to the language of design architectural terminology historic precedents and designers in addition to the why what and how of the design process the book is illustrated throughout with international examples of work by professionals and students in the discipline of architecture and other related design professions

completed projects receive more public attention than the process of their creation and so the myth that architects design buildings alone lives on in fact architects work with a great many others and the relationships that develop particularly with clients have a significant impact on design design through dialogue explores the relationship between client and architect through the lens of four overlapping activities that occur during any project relating talking exploring and transforming cases of design and collaboration range from smaller scale retail residential and educational projects in the us sweden the uk and the pacific rim to large institutions including seattle's central library the national museum of the american indian in washington dc the supreme court in jerusalem and the museum of new zealand material is taken from interviews with clients and architects and research in psychotherapy group dynamics and design studies throughout the book aspects of process are linked to design outcomes to illustrate how architects and clients collaborate creatively
