readers who haven't actually read their textbooks. Coon's text offers a solution. Coon effectively presents an approach that involves readers and gets them hooked on psychology and eager to read on because readers become actively involved with the material they develop a basic understanding of psychology that they take with them into their future courses and careers. Dennis Coon was the first textbook author to make effective use of cognitive principles to teach psychology by building each chapter around the SQ3R study reading formula: Survey, Question, Read, Recite, and Review. Because SQ3R has been a part of the underlying structure of the text from its inception, this proven method works better in Coon's text than in any of the many texts that have emerged over the years that have incorporated the SQ3R structure as an add-on.
