first published in 1848 authored by j d dana the manual of mineral science now enters its 23rd edition this new edition continues in the footsteps of its predecessors as the standard textbook in mineralogy mineral science earth materials rocks and minerals courses this new edition contains 22 chapters instead of 14 as in the prior edition this is the result of having packaged coherent subject matter into smaller more easily accessible units each chapter has a new and expanded introductory statement which gives the user a quick overview of what is to come just before these introductions each chapter features a new illustration that highlights some aspect of the subject in that particular chapter all such changes make the text more readable user friendly and searchable many of the first 14 chapters are reasonably independent of each other allowing for great flexibility in an instructor's preferred subject sequence the majority of illustrations in this edition were re rendered and or redesigned and many new photographs mainly of mineral specimens were added new thoroughly revised lab manual isbn13 978 0 471 77277 4 also published by john wiley sons the thoroughly

updated laboratory manual minerals and rocks exercises in crystal and mineral chemistry crystallography x ray powder diffraction mineral and rock identification and ore mineralogy 3e is for use in the mineralogy laboratory and covers the subject matter in the same sequence as the manual of mineral science 23e

as in previous editions clearly explained problem solving strategies continue to be the strength of this student friendly text which can be viewed as a traditional general chemistry text examples of this are that the text covers thermodynamics normally a topic split into two parts and covered in two different semesters in one chapter the book also follows a standard narrative example problem format has a solid traditional writing style and promotes problem solving however the authors have added elements to reflect changes in chemical education
