 FAQs  
 1 What is the difference between a debit and a credit  
 Debits increase asset and expense accounts and decrease liability, equity, and revenue accounts  
 Credits increase liability, equity, and revenue accounts and decrease asset and expense accounts  
 2 What are some common adjusting entries  
 Common adjusting entries include accruals (recording revenue earned but not yet collected or expenses incurred but not yet paid), deferrals (recording revenue received in advance or expenses paid in advance), and depreciation  
 3 How do I determine the correct account to use for a transaction  
 Consider the nature of the transaction and its impact on the accounting equation  
 For example, if a company purchases inventory on credit, the accounts affected are inventory (an asset) and accounts payable (a liability)
