wheat flour and bread have played a central role in sudan s political economy throughout the country s post independence history in 2019 increasing bread prices precipitated the

protests that ousted the government of Omar al-Bashir. How has Sudan's recent political transition and economic circumstances impacted distortions within the wheat value chain? What are the policy preferences of relevant stakeholders for improving the affordability of wheat products and the productivity of domestic wheat farmers? This paper addresses these questions by drawing on key informant interviews in Sudan and utilizing a political settlements approach which captures the underlying distribution of power among elites and citizens. The post-revolution political settlement contains a much broader distribution of power shared between a civilian alliance movement and the military, each of which has distinct interests in the wheat value chain. The paper elucidates the preferences of different stakeholders to address policy distortions and discusses bottlenecks that need to be overcome for those options to be feasible. In doing so, the analysis reveals that while the policy of subsidizing bread remains contentious, there are broader coalitions for interventions related to regulatory and monitoring reforms, improvements in domestic wheat procurement, enhanced agricultural investments, and targeted cash transfers to cushion subsidy reductions.

Evidenzbasiertes Regieren anhand von Statistiken ist schon immer ein Kennzeichen des modernen Staates. Der politisch-administrative Umgang mit der Corona-Pandemie, der von Inzidenzwerten des Infektionsgeschehens bestimmt ist, und zuvor schon die datengetriebene Bildungspolitik, insbesondere seit Einrichtung des Programme for International Student Assessment (PISA) der OECD im Jahr 2000, haben diese Praxis auf ein neues Niveau gehoben. Richard Münch zeigt, inwieweit diese Art des Regierens die Wissenschaft für die eigenen Legitimationszwecke instrumentalisiert, wie sie zu einer politisch-administrativen Kontrolle über alle Sektoren der Gesellschaft führt und wie sie sich in den Fallstricken des Szientismus verfängt. Zahlen und Modellrechnungen erzeugen so die These eines Schematismus des Entscheidens, der die Komplexität der konkreten Wirklichkeit verfehlt, sodass die gesetzten Ziele nicht erreicht werden und unerwünschte Nebenfolgen auftreten.

This book explores changing practice in history classrooms from the autonomy of the 1980s through the introduction of GCSEs and the national curriculum to the prescription of the national strategies and the pervasive influence of league tables in the first decade of the twenty-first century. It uses individual narratives from history teachers to shed light on a changing profession, showcasing research that is crucial reading for leaders in education. It uses oral accounts from 13 experienced teachers to provide a rich testimony of the constraints and affordances acting on history teachers. The book offers a unique perspective to show how teachers experienced steady but substantial changes in policy and autonomy and how this affected their practice. This detail enhances an analysis of policy and curricular

documents across three decades the findings are crucial for educational settings today facing crises of teacher recruitment and teacher retention this book will be of great interest to academics and higher degree research students in history education history of education and education policy it will also be of interest to beginning history teachers and senior school leaders responsible for teacher development and curriculum
