the first biographical dictionary in any western language devoted solely to chinese women
 biographical dictionary of chinese women is the product of years of research translation
 and writing by scores of china scholars from around the world volume ii twentieth century
 includes a far greater range of women than would have been previously possible because
 of the enormous amount of historical material and scholarly research that has become
 available recently they include scientists businesswomen sportswomen military officers
 writers scholars revolutionary heroines politicians musicians opera stars film stars artists
 educators nuns and more

although chinese medicine is assumed to be a timeless healing tradition the encounter
 with modern biomedicine threatened its very existence and led to many radical changes
 prescriptions for virtuosity tells the story of how doctors of chinese medicine have
 responded to the global dominance of biomedicine and developed new forms of virtuosity
 to keep their clinical practice relevant in contemporary chinese society based on extensive

ethnographic and historical research the book documents the strategies of chinese medicine doctors to navigate postcolonial power inequalities doctors have followed two seemingly contradictory courses of action first they have emphasized the unique chinese characteristics of their practice defining them against the perceived strengths of biomedicine and producing an ontological divide between the two medical systems these oppositions have inadvertently marginalized chinese medicine making it seem appropriate for clinical use only when biomedical solutions are lacking second doctors have found points of convergence to facilitate the blending of the two medical practices producing innovative solutions to difficult clinical problems prescriptions for virtuosity examines how the postcolonial condition can generate not only domination but hybridity karchmer shows for example how the clinical methodology of pattern discrimination and treatment determination bianzheng lunzhi which is today celebrated as the quintessential characteristic of chinese medicine is a twentieth century invention when subjected to the institutional standardizations of hospital practice bianzheng lunzhi can lead to an impoverished form of medicine but in the hands of a virtuoso physicians it becomes a dynamic tool for moving between biomedicine and chinese medicine to create innovative new therapies
