although everyone agrees on the need to make government work better few understand public bureaucracy sufficiently well to offer useful suggestions either theoretical or practical in fact some consider bureaucratic efficiency incompatible with democratic government douglas yates places the often competing aims of efficiency and democracy in historical perspective and then presents a unique and systematic theory of the politics of bureaucracy which he illustrates with examples from recent history and from empirical research he argues that the united states operates under a system of bureaucratic democracy in which governmental decisions increasingly are made in bureaucratic settings out of the public eye he describes the rational selfinterested bureaucrat as a minimaxer who inches forward inconspicuously gradually accumulating larger budgets and greater power in an atmosphere of segmented pluralism of conflict and competition of silent politics to make the policy process more competitive democratic and open yates calls for strategic debate among policymakers and bureaucrats and insists that bureaucrats should give a public accounting of their significant decisions rather than bury them in incremental changes he offers concrete proposals applicable to federal state and local governments for simplifying the now chaotic bureaucratic policymaking system and at the same time bolstering representation and openness this is a book for all political scientists policymakers government officials and concerned citizens it may well become a classic statement on the workings of public bureaucracy

in this original study abbas pourgerami provides a comprehensive analysis of economic development and its relationship to political democracy evaluating statistical associations among social economic and political performance variables of 104 third world countries pourgerami determines the prospects for democracy in the developing world he demonstrates that economic well being and political liberty are mutually reinforcing processes challenging the traditional notion that economic progress necessitates sacrifices to democratic

government
