this book provides an introduction to the design and mechanical development of reciprocating piston engines for vehicular applications beginning from the determination of required displacement and performance coverage moves into engine configuration and architecture critical layout dimensions and design trade offs are then presented for pistons crankshafts engine blocks camshafts valves and manifolds coverage continues with material strength and casting process selection for the cylinder block and cylinder heads each major engine component and sub system is then taken up in turn from lubrication system to cooling system to intake and exhaust systems to nvh for this second edition latest findings and design practices are included with the addition of over sixty new pictures and many new equations

this book is intended to serve as a comprehensive reference on the design and development of diesel engines it talks about combustion and gas exchange processes with important references to emissions and fuel consumption and descriptions of the design of various parts of an engine its coolants and lubricants and emission control and optimization techniques some of the topics covered are turbocharging and supercharging noise and vibrational control emission and combustion control and the future of heavy duty diesel engines this volume will be of interest to researchers and professionals working in this area

advanced tribology is the proceedings of the 5th china international symposium on tribology held every four years and the 1st international tribology symposium of iftomm held in beijing 24th 27th september 2008 it contains seven parts lubrication friction and wear micro nano tribology tribology of coatings surface and interface biotribology tribochemistry industry tribology the book reflects the recent progress in the fields such as lubrication friction and wear coatings and precision manufacture etc in the world the book is intended for researchers engineers and graduate students in the field of tribology lubrication mechanical production and industrial design the editors jianbin luo yonggang meng tianmin shao and qian zhao are all the professors at the state key lab of tribology tsinghua university beijing
