as water scarcities increase nations throughout the world are in search of better institutions to manage water resources india has been making substantial efforts to develop its water management systems since independence and significant increases in irrigated agriculture have taken place through both public and private initiatives however scarcities are increasing and major problems presently confront the

management of water resources and irrigated agriculture resolving these problems is crucial for the future

over the past one hundred years in particular there has been a steady process by which natural resources such as ground water forests fishing grounds and grazing land have been increasingly managed by centralised institutions governments and other national agencies have argued that this promotes efficiency equity and other wide national goals recently this orthodoxy has been challenged by rising numbers of experiments that show how centralised management tends to fail global national and local goals are more likely to be met at lower cost and with other benefits such as promoting better democratic institutions by involving local populations in collaborative management agreements this volume based on detailed case studies from around the world subjects some of these experiments to critical study and suggests limits to the participative approach as well as ways it can be improved and made suitable for new contexts

the three dominant forces shaping societies and economies around the world are globalization privatization and liberalization because these processes are interrelated they must be addressed collectively the contributors to the volume show that globalization privatization and liberalization are multidimensional phenomena that impact not only the economic considerations of governments but also sociocultural and environmental aspects of societies the three phenomena also affect these units of analysis which rao and his colleagues identify as regional country industrial and organizational the result is a cogent discussion of these powerful global forces for the academic community professionals in economic development banking finance international investment and global commerce after treating the conceptual issues of meaning definition and differing interpretations and perspectives the volume examines the historical experience with regional economic integration the flow of foreign direct investment a major consquence of globalization privatization and liberalization of economies is considered next this leads to a study of the challenges created for management at the microlevel in organizations such as the intensification of competitiveness and the increased importance of technology and technology management in their examination of country specific issues the contributors show how widely experiences vary with regard to the way in which the three major processes are implemented and how the policies behind them are adopted finally in their discussion of sectoral and industry specific issues the contributors note that great variations on how different industrial sectors and industries will approach and recreate themselves under the power of the three great processes

this proceedings volume presents 41 high quality research contributions at the forefront of soft computing theory and applications and real world impact the third volume from this conference its chapters reflect the current trajectory of soft computing research covering advances in machine learning neural networks fuzzy systems nature inspired algorithms and big data analytics applications discussed range across critical domains

such as healthcare education legal systems cybersecurity environmental monitoring and industrial automation noteworthy contributions include studies on smart assistive devices for alzheimer s patients intelligent classification of recycled materials and ai based criminal face detection systems on the theoretical side the volume includes novel algorithmic developments such as the shuffled flamingo search algorithm and structural insights into swarm based optimisation the volume illustrates how soft computing continues to address complex real world problems through adaptive scalable and human centric approaches it also captures the spirit of interdisciplinary engagement with contributions from early career researchers alongside seasoned academics enriching the community s collaborative potential this book will be of interest to researchers engineers practitioners and postgraduate students working in artificial intelligence optimisation and computational intelligence particularly those interested in the translational impact of soft computing across diverse sectors

with a state of the art perspective on corporate board decision making that encourages thinking outside the box this cutting edge research handbook provides fresh insights on the meaning value contribution quality and purpose of the decision making of those charged with corporate governance

in today s academic environment the challenge of ensuring lasting commercial and economic success for organizations has become more daunting than ever before the relentless surge in data driven decision making based on innovative technologies such as blockchain iot and ai has created a digital frontier filled with complexity maintaining a healthy firm that can continually provide innovative products and services to the public while fueling economic growth has become a formidable puzzle moreover this digital transformation has ushered in new risks from pervasive cybersecurity threats to the ethical challenges surrounding artificial intelligence in this evolving landscape academic scholars face the pressing challenge of deciphering the path to long term organizational prosperity in an era dominated by data data driven decision making for long term business success serves as guidance and insights amidst this academic challenge it is the definitive solution for scholars seeking to uncover the complexities of data driven decision making and its profound impact on organizational success each meticulously curated chapter delves into a specific facet of this transformative journey from the implications of modern technologies and pricing optimization to the ethics underpinning data driven strategies and the metaverse s influence on decision making

demonstrating the profound impact of the green concept s emergence and how companies are altering their marketing strategies to leverage green and sustainable messaging this work presents real cases from around the world and how they are used for business success
