a description of the lower paleozoic stratigraphy and structure east of mount katahdin

restructuring the philadelphia region offers one of the most comprehensive and careful investigations written to date about metropolitan inequalities in america s large urban regions moving beyond simplistic analyses of cities versus suburbs the authors use a large and unique data set to discover the special patterns of opportunity in greater philadelphia a sprawling complex metropolitan region consisting of more than 350 separate localities with each community operating its own public services and competing to attract residents and businesses the places people live offer them dramatically different opportunities the book vividly portrays the region s uneven development paying particular attention to differences in housing employment and educational opportunities in different communities and describes the actors who are working to promote greater regional cooperation surprisingly local government officials are not prominent among those actors instead a rich network of third sector actors represented by nonprofit organizations quasi governmental authorities and voluntary associations is shaping a new form of regionalism
