this open access book presents work collected through the liquefaction experiments and analysis projects leap in 2017 it addresses the repeatability variability and sensitivity of lateral spreading observed in twenty four centrifuge model tests on mildly sloping liquefiable sand the centrifuge tests were conducted at nine different centrifuge facilities around the world for the first time a sufficient number of experiments were conducted to enable assessment of variability of centrifuge test results the experimental data provided

a unique basis for assessing the capabilities of twelve different simulation platforms for numerical simulation of soil liquefaction the results of the experiments and the numerical simulations are presented and discussed in papers submitted by the project participants the work presented in this book was followed by leap asia that included assessment of a generalized scaling law and culminated in a workshop in osaka japan in march 2019 leap 2020 ongoing at the time of printing is addressing the validation of soil structure interaction analyses of retaining walls involving a liquefiable soil a workshop is planned at rpi usa in 2020

the so called fourth dimension of a metropolis is the underground space beneath a city which typically includes structures such as tunnels which facilitate transport and provide gas water and other supplies underground space may also be utilised for living working and recreational facilities and industrial storage these volumes focus on underg
