this practical and accessible book focuses on the verbal and numerical reasoning exercises which form a key part of the police recruit assessment process the book clearly explains the purpose of the reasoning tests why these skills are important for a career in the police and examines the format and structure of the tests it provides an explanation of the basic numeric rules and operations required for the numerical reasoning tests with questions to check understanding and a number of full mock tests with answers for both verbal and numerical reasoning

it is the business of science not to create laws but to discover them we do not originate the constitution of our own minds greatly as it may be in our power to modify their character and as the laws of the human intellect do not depend upon our will so the forms of science of 1 1 which they constitute the basis are in all essential regards independent of individual choice george boole 10 p 11 1 comparison with traditional logic the logic of this book is a probability logic built on top of a yes no or 2 valued logic it is divided into two parts part i bp logic and part ii m logic bp stands for bayes postulate this postulate says that in the absence of knowledge concerning a probability distribution over a universe or space one should assume 1 a uniform distribution 2 the m logic of part ii does not make use of bayes postulate or of any other postulates or axioms it relies exclusively on purely deductive reasoning following from the definition of probabilities the m logic goes an important step further than the bp logic in that it can distinguish between certain types of information supply sentences which have the same representation in the bp logic as well as in traditional first order logic although they clearly have different meanings see example 6 1 2 also comments to the paris rome problem of eqs 1 8 1 9 below

this book constitutes the proceedings of the third international congress on tools for teaching logic ticftl 2011 held in salamanca spain in june 2011 the 30 papers presented were carefully reviewed and selected from 62 submissions the congress focusses on a variety of topics including logic teaching software teaching formal methods logic in the humanities dissemination of logic courseware and logic textbooks methods for teaching logic at different levels of instruction presentation of postgraduate programs in
