this proceedings volume covers a range of research topics in algebra from the southern regional algebra conference srac that took place in march 2017 presenting theory as well as computational methods featured survey articles and research papers focus on ongoing research in algebraic geometry ring theory group theory and associative algebras topics include algebraic groups combinatorial commutative algebra computational methods for representations of groups and algebras group theory hopf galois theory hypergroups lie superalgebras matrix analysis spherical and algebraic spaces and tropical algebraic geometry since 1988 srac has been an important event for the algebra research community in the gulf coast region and surrounding states building a strong network of algebraists that fosters collaboration in research and education this volume is suitable for graduate students and researchers interested in recent findings in computational and theoretical methods in algebra and representation theory

cholesterol is an essential component of the plasma membrane phosphatidylinositol 4 5 bisphosphate pi 4 5 p2 although a minor phospholipid is the most abundant membrane phosphoinositide both lipids play key roles in a variety of cellular functions including as signalling molecules and major regulators of protein function studies on these important lipids have traditionally focused on the effect of each lipid individually accumulating evidence indicates however that these lipids may cross regulate each other s levels furthermore it is becoming evident that cholesterol and pi 4 5 p2 can act together to modulate protein

function and biological processes this book provides an overview of cellular functions and molecular mechanisms in which cholesterol and pi 4 5 p2 functions extend from parallel existence to crosstalk it includes four sections the first section introduces the reader to cholesterol and pi 4 5 p2 the second section demonstrates the mutual influence of these two critical lipids on their levels the third section divided into two parts describes the co modulation of protein function by cholesterol and pi 4 5 p2 the first part focuses on ion channels and the second on lipid transfer proteins the fourth section highlights other cellular processes at the intersection of cholesterol and pi 4 5 p2 involvement collectively the book portrays the emerging relationship between cholesterol and pi 4 5 p2 in a broad array of biological systems and processes the book will be of interest to a wide audience of research scientists with an interest in the biophysical properties of lipids and the physiological consequences of their presence in biological systems as well as graduate students postdoctoral trainees basic and clinical researchers and pharmaceutical scientists specifically the content will be relevant to researchers in the fields of biochemistry molecular biophysics pharmacology neurobiology cardiovascular biology among others provides a comprehensive overview of the current knowledge of the interplay between cholesterol and pi 4 5 p2 provides an overview of the emerging relationship between cholesterol and pi 4 5 p2 in biological systems and processes discusses cellular processes and molecular mechanisms where lipid functions extend from parallel existence to crosstalk

this issue of neutrosophic sets and systems presents a collection of advanced studies in neutrosophy and its applications across various fields extending concepts like fuzzy sets and logic the papers address topics related to managing uncertainty indeterminacy and ambiguity in complex systems key applications include mathematics such as fixed point theorems and topological spaces and engineering problems such as highway asphalt pavement maintenance and traffic management the issue also explores the use of neutrosophic frameworks in decision making and evaluation with articles on e commerce website

quality supply chain performance academic teaching assessment and the evaluation of hotel service quality other papers apply the neutrosophic approach to areas like stock market analysis green technology innovation and the automated generation of digital media content the research demonstrates the utility of neutrosophic theory in providing robust and transparent solutions where traditional deterministic models may fall short

this book presents several recent advances on evolutionary computation specially evolution based optimization methods and hybrid algorithms for several applications from optimization and learning to pattern recognition and bioinformatics this book also presents new algorithms based on several analogies and metafores where one of them is based on philosophy specifically on the philosophy of praxis and dialectics in this book it is also presented interesting applications on bioinformatics specially the use of particle swarms to discover gene expression patterns in dna microarrays therefore this book features representative work on the field of evolutionary computation and applied sciences the intended audience is graduate undergraduate researchers and anyone who wishes to become familiar with the latest research work on this field

this volume constitutes the proceedings of the 18th mexican conference on artificial intelligence micai 2019 held in xalapa mexico in october november 2019 the 59 full papers presented in this volume were carefully reviewed and selected from 148 submissions they cover topics such as machine learning optimization and planning fuzzy systems reasoning and intelligent applications and vision and robotics
