the united states has publicly funded its human spaceflight program on a continuous basis for more than a half century through three wars and a half dozen recessions from the early mercury and gemini suborbital and earth orbital missions to the lunar landings and thence to the first reusable winged crewed spaceplane that the united states operated for three decades today the united states is the major partner in a massive orbital facility the international space station that is becoming the focal point for the first tentative steps in commercial cargo and crewed orbital space flights and yet the long term future of human spaceflight beyond this project is unclear pronouncements by multiple presidents of bold new ventures by americans to the moon to mars and to an asteroid in its native orbit have not been matched by the same commitment that accompanied president kennedy's now fabled 1961 speech namely the substantial increase in nasa funding needed to make it happen are we still committed to advancing human spaceflight what should a long term goal be and what does the united states need to do to achieve it

pathways to exploration explores the case for advancing this endeavor drawing on the history of rationales for human spaceflight examining the attitudes of stakeholders and the public and carefully assessing the technical and fiscal realities this report recommends maintaining the long term focus on mars as the horizon goal for human space exploration with this goal in mind the report considers funding levels necessary to maintain a robust tempo of execution current research and exploration projects and the time resources needed to continue them and international cooperation that could contribute to the achievement of spaceflight to mars according to pathways to exploration a successful u s program would require sustained national commitment and a budget that increases by more than the rate of inflation in reviving a u s human exploration program capable of answering the enduring questions about humanity s destiny beyond our tiny blue planet the nation will need to grapple with the attitudinal and fiscal realities of the nation today while staying true to a small but crucial set of fundamental principles for the conduct of exploration of the endless frontier the recommendations of pathways to exploration provide a clear map toward a human spaceflight program that inspires students and citizens by furthering human exploration and discovery while taking into account the long term commitment necessary to achieve this goal

service in this book refers to the behaviors and actions of serving customers selling in this book refers to the behaviors and actions of selling products to customers hence this book is completely different from other books on these subjects despite the fact that there are many books on service improvement and many related to selling skills worldwide there are few books on how service and selling are integrated and coordinated primarily it focuses on the interaction and transition between the behavior of service and the behavior of selling by sharing methods and skills of how those two are interrelated this book provides many helpful guidelines and solutions for turning customers satisfaction with service into growth in sales through many refreshing ideas the author helps you deeply understand the significance of integration of and conversion between service and selling and the harm of disconnection between service and selling many new ideas and viewpoints which are different from other service books or sales books are discussed such as the contention that over service and over selling should be prevented instead of giving highly complex and abstract definitions of service or selling this book redefines service and selling with say yes to customers and make customers say yes respectively insisting that customers satisfaction with service will naturally lead to their long term loyalty this book emphasizes that customers satisfaction with service has a shelf lifetime which will soon fade over time taking the achievement of customer satisfaction as the final purpose of service the author believes that the end of service is not customer satisfaction but to create new customer needs and achieve increased sales taking meeting or exceeding customer expectations as the golden rule the author insists that customer expectations need to be reduced first then satisfied and upgraded finally focusing on the development of customers buying needs like other books do this book focuses oppositely on the research of why customers have no buying needs
