the nwo programme the societal aspects of genomics has called for stronger means of collaboration and deliberative involvement between the various stakeholders of genomics research within the project group assembled at the uh this call was translated to the lingua democratica in which the prerequisites of such deliberative efforts were put to scrutiny the contribution of this thesis has taken a more or less abstract angle to this task and sought to develop a vocabulary that can be shared amongst various stakeholders with different backgrounds interests and stakes for any complex theme although genomics has more or less been in focus throughout the research as

complexity thinking is currently a theme in both the hard sciences as the social sciences and the humanities and has always been an issue for professionals this concept was pivotal in achieving such an inclusive angle however in order to prevent that complexity would become fragmented due to disciplinary boundaries it is essential that those aspects of complexity that seem to return in many discussions would be made clear and stand out with respect to the complexities of specialisation the thesis has argued that the concept of patterns applies for these aspects and they form the backbone of the vocabulary that has been developed especially patterns of feedback have been given much attention as this concept is pivotal for many complex themes however although patterns are implicitly or explicitly used in many areas there is little methodological and philosophical underpinning of what they are and why they are able to do what they do as a result quite some attention has been given to these issues and how they relate to concepts such as information order and complexity itself from these explorations the actual vocabulary was developed including the methodological means to use this vocabulary this has taken the shape of a recursive development of a so called pattern library which has crossed disciplinary boundaries from technological areas through biology psychology and the social sciences to a topic that is typical of the humanities this journey across the divide of c p snow s two cultures is both a test for a lingua democratica as well as aimed to demonstrate how delicate and balanced such a path must be in order to be effective especially if one aims to retain certain coherence along the way finally the methodology has been applied in a very practical way to a current development that hinges strongly on research in genomics which is trans humanist movement

introduction to computational models with python explains how to implement computational models using the flexible and easy to use python programming language the book uses the python programming language interpreter and several packages from the huge python library that improve the performance of numerical computing such as the numpy and scipy m
