MARTHA Martha from the Margins Martha Martha *Paul Penfield Allie Ernst Smith Friedrich von Flotow*

martha is a set of general purpose programs for analyzing linear electrical networks available to users with access to apl time sharing systems the programs analyze as a function of frequency most linear transmission type networks with an input and an output this includes most filters amplifiers microwave networks and feedback systems even if such circuits are relatively complicated with multiple feedback paths and branches the programs cannot handle some complicated interconnections of components and are not set up to analyze nonlinear or time varying networks the topology of the network is described using wiring operators the elements available include lumped and distributed active and passive reciprocal and nonreciprocal elements the possible output includes tow port parameters impedance admittance hybrid scattering and abcd matrices as well as voltage gain insertion gain transducer gain etc these their real or imaginary parts or magnitude or phase may be printed or plotted as functions of frequency or of each other more than one network can be analyzed simultaneously martha is not inherently better at one frequency range than another except perhaps in its repertoire of elements and response functions martha includes besides r l and c sixteen controlled sources operational amplifiers mutual inductance three transistor models and the possibility of easily creating others ideal transformers several composite pi and tee structures and a few exotic elements such as gyrators for high frequency applications martha has several microwave elements including tem transmission lines waveguides attenuators and isolators

in the popular imagination martha has become synonymous with the harried housewife fretting over excessive preparations the martha known to early christians is far removed from this stereotype martha was better known for her role in the story of the raising of lazarus and as apostle and witness of the resurrection this book gathers and assesses the early traditions about martha in text liturgy and iconography it shows that the significance of martha has been seriously underestimated and recovers an important and widespread tradition of martha as apostle and authority figure for early christians the analysis of martha traditions with attention to

issues of gender and authority render this book an important contribution to studies on women in early christianity
