influence from mesopotamia on adjacent civilizations has often been proposed on the basis of scattered similarities for the first time a wide ranging assessment from 3000 bc to the middle ages investigates how similarities arose in egypt palestine anatolia and greece the development of writing for accountancy astronomy divination and belles lettres emanated from mesopotamians who took their academic traditions into countries beyond their political control each country soon transformed what it received into its own individual culture when cuneiform writing disappeared babylonian cults and literature now in aramaic and greek flourished during the roman empire the manichaeans adapted the old traditions which then perished under persecution but traces persist in hermetic works

court narratives and romances and in the arabian nights when ancient mesopotamia was rediscovered in the last century british scholars were at the forefront of international research public excitement has been reflected in pictures and poems films and fashion

ancient kings who did not honor the gods overlooked an indispensable means for ruling effectively in their communities in many traditional societies royal authority was regarded as a divine gift bestowed according to the quality of the relationship of the king both to god or the gods and to the people the tension and the harmony within these human and divine relationships demanded that the king repeatedly strive to integrate the community's piety with his political strategies this fascinating study explores the relationship between religion and royal authority in three of history's most influential civilizations homeric greece biblical israel and old babylonian mesopotamia dale launderville identifies similar contrasting and analogous ways that piety functioned in these distinct cultures to legitimate the rule of particular kings and promote community well being key to this religiopolitical dynamic was the use of royal rhetoric which necessarily took the form of political theology by examining a host of ancient texts and drawing on the insights of philosophers poets historians anthropologists social theorists and theologians launderville shows how kings increased their status the more they demonstrated through their speech and actions that they ruled on behalf of god or the gods launderville's work also sheds light on a number of perennial questions about ancient political life how could the people call the king to account did the people forfeit too much of their freedom and initiative by giving obedience to a king who symbolized their unity as a community how did the religious traditions serve as a check on the king's power and keep alive the voice of the people this study in comparative political theology elucidates these engaging concerns from multiple perspectives making piety and politics of interest to readers in fields ranging from biblical studies and theology to ancient history and political science

this engaging and informative introduction to the the babylonians were important not only because of their many historical contacts with ancient israel but because they and their predecessors the sumerians established the philosophical and social infrastructure for most of western asia for nearly two millennia beginning and advanced students as well as biblical scholars and interested

christians today are focused on two important creation topics how the world came to be and how we should care for it a highly respected old testament theologian recommends that before discussing these questions we focus on god the creator and god s ongoing work in creation we should explore what the bible tells us and let the text set the agenda for our reflections combining his storytelling gift with rigorous biblical exegesis and deep reflection ben ollenburger describes the action of god the creator as presented throughout the old testament he shows how creation is about more than origins it is about god acting against the hostile forces of chaos that can be historical political and military about how god created a well ordered world and how human transgression ruptures

god's relationship with humans and threatens creation about how god responds as creator to those threats by disturbing and reordering the disorder bringing about what god intended a world ordered in the social political and natural realms that is characterized by the justice righteousness and peace required for human flourishing
