this book presents advances in security assurance for cyber physical systems cps and  
 report on new machine learning ml and artificial intelligence ai approaches and  
 technologies developed by the research community and the industry to address the  
 challenges faced by this emerging field cyber physical systems bridge the divide  
 between cyber and physical mechanical systems by combining seamlessly software  
 systems sensors and actuators connected over computer networks through these  
 sensors data about the physical world can be captured and used for smart autonomous  
 decision making this book introduces fundamental ai ml principles and concepts applied  
 in developing secure and trustworthy cps disseminates recent research and  
 development efforts in this fascinating area and presents relevant case studies  
 examples and datasets we believe that it is a valuable reference for students instructors
