excerpt from an introduction to the study of landscape design we have chosen the illustrations primarily to show points in the discussion which cannot so well be expressed in words also as far as we were able consistently with their other uses we have tried to have the pictures in themselves good examples of composition in various modes we have been content to forego in many instances the use of pictures of subjects already well covered in other books for instance gates garden furniture steps fountains and so on about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

examining what landscape is and how we use a range of ideas and techniques to study it andrew goudie and heather viles demonstrate how geomorphologists have built on classic methods pioneered by some great 19th century scientists to examine our earth

a compilation of theories issues and ideas in all areas of landscape design addressed to architects urban planners and designers often emphasizing links to related disciplines motloch considers such topics as the meaning of landscape design paradigms and the implications of natural features well illustrated in b w annotation c 2003 book news inc portland or booknews.com

this text introduces geography as a social science by emphasizing the relevance of geographic concepts to human problems the relationship between globalisation and cultural diversity underlies the material the book is aimed at students taking introductory courses in human geography or cultural geography

landscape protection management and planning entail rights and responsibilities for everyone the council of europe landscape convention aims to promote the protection management and planning of landscapes and to organise international co operation in this field it applies to the entire territory of the contracting parties and covers natural rural urban and peri urban areas it concerns landscapes considered outstanding as well as everyday or degraded areas this publication presents thoughts and proposals for the implementation of the convention and addresses a mosaic of key issues related to its future it forms part of a process of reflection on major themes concerning the living environment

the roots of environmental aesthetics reach back to the ideas of eighteenth century thinkers who found nature an ideal source of aesthetic experience today having blossomed into a significant subfield of aesthetics environmental aesthetics studies and encourages the appreciation of not just natural environments but also human made and human modified landscapes nature and landscape is an important introduction to this rapidly growing area of aesthetic understanding and appreciation allen carlson begins by tracing the development of the field's historical background and then surveys contemporary positions on the aesthetics of nature such as scientific cognitivism which holds that certain kinds of scientific knowledge are necessary for a full appreciation of natural environments carlson next turns to environments that have been created or changed by humans and the dilemmas that are posed by the appreciation of such landscapes he examines how to aesthetically appreciate a variety of urban and rural

landscapes and concludes with a discussion of whether there is in general a correct way to aesthetically experience the environment

excerpt from an introduction to the study of landscape design we mean this book to present a general conception of landscape design which may enable a designer better to determine for himself the relations of the objects and ideas with which he is dealing and better to prepare and use in a decisive way in the individual problems of his profession the natural aptitudes and acquired knowledge which are the tools of his trade the book may also serve as a general introduction to the subject for those whose interest in it is purely that of appreciation and enjoyment of landscape designs and of natural landscapes the rapid growth of landscape architecture as an independent profession has been very recent nearly all the trained men in the field are giving their energies to active practice rather than to theorizing or to writing it is natural therefore that the bulk of the detailed printed information on construction and planting which the landscape architect uses should have originated in the older fields of architecture and engineering and horticulture that the discussions of general esthetics should have little specific reference to the problems of the landscape architect and that while there have been many books on special problems and special aspects of the field there should have appeared up to this time no book treating generally of landscape design adequate to the modern development of the subject and of the profession this book is not a compendium of useful information as to the practicalities of landscape construction though such a book is much needed nor is it primarily a book of pictures of completed work to which the designer may go to see how problems similar to his own have been met before it is emphatically not a book of rules which are supposed automatically to produce good design if religiously followed there are no such rules and no esthetic theory is final about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

based on both research and practical experience ecological landscape design and planning offers a holistic methodological approach to landscape design and planning it focuses on the scarcity of natural resources in the mediterranean and the need to aim for long term ecological stability and environmental sustainability the principles of this approach therefore can be used as a theoretical foundation for holistic landscape research creative ecological design and better sustainable practice development
