embark on a journey through the profound mysteries of existence in why we were created and why it matters delve into probing questions like why the creation and who is the creator as you explore the depths of human inquiry unravel the enigmatic journey of creation from its inception billions of years ago to its eventual demise journey through the wisdom of einstein and the legacy of muhammad the final messenger to uncover the complexities of faith and reason discover the purpose behind our existence and our role as stewards of the earth from the beauty of diversity to the promise of divine justice find hope and enlightenment within the pages of this insightful work

what kind of language do we use to name and describe the animals that feature in our lives what names do we give to animals as individuals and groups and how do these influence our perceptions of them how do our descriptions of different species overlap with the words we use about categories of people answering these questions and more this book presents evidence from an extensive research project into how animals are represented in contemporary english it draws on a multi million word corpus of texts from a wide range of sources as well as interviews with professional communicators about animals and focus groups involving people with different experiences of and attitudes towards animals in various contexts language about animals is explored thematically focusing on topics such as names descriptions places communication and ethics the book highlights both what we know from scientific research about the huge diversity of animals capacities and lifestyles and how the language we use to communicate about them affects how we understand them and how we treat them the methods used to investigate these topics include corpus linguistic analysis using specialised software as well as close reading of specific examples providing a fascinating insight into the way we talk about animals this book brings together new material from scientific studies and popular culture to explore the relationships between humans and other animals it will appeal to a wide readership in light of the climate crisis and awareness of the loss of biodiversity both globally and locally

people typically misunderstand how power works in schools common thinking says that things like high stakes testing school reform efforts and political mandates exert the most power on schools the reality however is that power comes from everywhere it isn t a thing that only certain people possess nor does it operate linearly as in simple actions and

reactions instead power acts more like a web if you exert power in one part of a school the effects often spread across the rest of it the usual emphasis on big easy to see influences causes schools to focus on the wrong concerns the big public ones instead of the ones which make the most impact the small daily ones this book examines everyday phenomena inside schools to reveal the complexity and nuance of power and makes practical suggestions for how schools can manage power more effectively to maximize students learning

this book illustrates that the stereotypical representations of gregor mendel and his work misrepresent his findings and their historical context the author sets the historical record straight and provides scientists with a reference guide to the respective scholarship in the early history of genetics the overarching argument is twofold on the one hand that we had better avoid naïve hero worshipping and understand each historical figure mendel in particular by placing them in the actual sociocultural context in which they lived and worked on the other hand that we had better refrain from teaching in schools the naive mendelian genetics that provided the presumed scientific basis for eugenics key features corrects the distorting stereotypical representations of mendelian genetics and provides an authentic picture of how science is done focusing on gregor mendel and his actual contributions to science explains how the oversimplifications of mendelian genetics were exploited by ideologues to provide the presumed scientific basis for eugenics proposes a shift in school education from teaching how the science of genetics is done using model systems to teaching the complexities of development through which heredity is materialized
