many of the revolutionary effects of science and technology are obvious enough bertrand russell saw in the 1950s that there are also many negative aspects of scientific innovation insightful and controversial in equal measure russell argues that science offers the world greater well being than it has ever known on the condition that prosperity is dispersed power is diffused by means of a single world government birth rates do not become too high and war is abolished russell acknowledges that is a tall order but remains essentially optimistic he imagines mankind in a race between human skill as to means and human folly as to ends but believes human society will ultimately choose the path of reason this routledge classics edition includes a new preface by tim sluckin

this book examines and clarifies the nature meaning significance and vitality of the sacred and the profane in relation to some of the diverse religions of the world and the rich and multifarious traditions of the sacred in many cultures and times in the context of ontology broadly the philosophical study or investigation of being it provides incisive critical analyses and evaluations of many important contributions to our understanding of the sacred and the holy especially in relation to the world s religions religious experience religious insight or knowledge metaphysics mythology and mysticism a number of important theories and explanations are also critically analyzed and evaluated including the numinous theory of the sacred and the holy otto the psychodynamic theory freud the sociological theory durkheim empirical theories russell and ayer the ontological question heidegger and the hierophantic theory eliade among others the book concludes with a number of reflections on the ontology of the sacred and the profane in relation to philosophy and science that will open up new pathways of thinking reflection and investigation in the 21st century

frank russell was the grandson of prime minister lord john russell and elder brother of philosopher bertrand he was in his own right a radical political reformer and outspoken self determined moralist he was also a serial adulterer and convicted bigamist sent down from oxford

for supposed homosexual practices

first published in 1954 *Human Society in Ethics and Politics* is Bertrand Russell's last full account of his ethical and political positions relating to both politics and religion. Ethics, he argues, are necessary to man because of the conflict between intelligence and impulse; if one were without the other, there would be no place for ethics. Man's impulses and desires are equally social and solitary. Politics and ethics are the means by which we, as a society and as individuals, become socially purposeful and moral. Codes inculcate our rules of action.

What is a realist response to nuclear weapons? This book is animated by the idea that contemporary attempts to confront the challenge of nuclear weapons and other global security problems would benefit from richer historical foundations. Returning to the decade of deep thermonuclear anxiety inaugurated in the early 1950s, the authors focus on four creative intellectuals: Günther Anders, John H. Herz, Lewis Mumford, and Bertrand Russell, whose work they reclaim under the label of nuclear realism. This book brings out an important oppositional and resolutely global strand of political thought that combines realist insights about nuclear weapons with radical proposals for social and political transformation as the only escape from a profoundly endangered planet. Nuclear realism is a highly original and provocative study that will be of great use to advanced undergraduates, graduates, and scholars of political theory, international relations, and cold war history.

Hermann Lotze was a key figure in the philosophy of the second half of the 19th century, influencing practically all leading philosophical schools of the late 19th and the early 20th century: i. the neo-Kantians, ii. Brentano and his school of descriptive psychology, iii. the British idealists, iv. Husserl's phenomenology, v. Dilthey's philosophy of life, vi. Frege's new logic, vii. the early Cambridge analytic philosophy, viii. William James's pragmatism. The book first presents the main ideas of Hermann Lotze's philosophy (part I) and then traces his influence on the descriptive psychology of Franz Brentano and Carl Stumpf (part 2) and Cambridge analytic philosophy (part 3). In addition, the book includes Bertrand Russell's conspectus of J. E. McTaggart's 1898 lectures on Lotze.

Modern Social Thought ranges widely from the social sciences to philosophy, political theories and doctrines, cultural ideas and movements, and the influence of the natural sciences. It provides an authoritative overview of the main themes of social thought. Long essays and entries give full coverage to each topic, covers major currents of thought, philosophical and cultural trends, and the individual social sciences from anthropology to welfare, economics. New edition updates about 200 entries and includes new entries, suggestions for further reading, and a bibliography of all sources cited within the text.

Originally entitled *Why Men Fight*, this work is generally seen as the fullest expression of Russell's political philosophy. The ideas laid out here greatly contributed to Russell's fame as a social critic and anti-war activist.

Through six successful editions of *Power and Society*, Thomas R. Dye has encouraged readers to pursue their interests in the social sciences by illustrating how important these disciplines are to understanding many conditions of our lives. As Dye introduces readers to the central concepts of sociology, anthropology, economics, political science, history, and psychology, he links elements of these disciplines through a dynamic and unifying theme: the manifestation of power in society. With this idea in mind, readers gain a real sense of social scientists' interests as they explore power in the context of social problems such as racism, sexism, poverty, crime, violence, urban decay, and international and ideological conflict. Dye's presentation includes analyses of social science research studies and the contributions of masters of social thought such as Bertrand Russell, Karl Marx, Sigmund Freud, and Martin Luther King Jr. Evocative discussions are enhanced with case studies and cross-national perspectives to highlight critical ideas, including the power and society theme, the approach of learning to understand power as an integral part of our social world. Continues with great impact in this seventh edition, among the new topics readers will find how men and women view their relations today, evolutionary psychology, the mating game, the
