international economic theories emerged within particular social economic and political frameworks and were developed as solutions to the problems of contemporary economics in order to understand the increasingly complex and interdependent state of today s international economy we need to realise the importance of those theories that came before however many international economics textbooks do not place the theories they discuss within this historical context theories of international economics aims to redress the balance by taking a pluralistic approach presenting with authority both orthodox and heterodox international economic theories each chapter shows the necessarily interdependent nature of schools of international economic theories by including an historical component that shows how each school of thought developed why it developed and what it has to say about the contemporary world this text examines a wide range of theories with an emphasis on the benefits of a pluralistic approach addressing schools of thought including classical neoclassical keynesian post keynesian marxian austrian institutional and feminist economics mercantilism and neo mercantilism alongside and in relation to each other this approach allows the scholarly value of each approach to be understood and appreciated and in doing so enables a greater understanding of the world economy this book is suitable for use as either a core or supplementary text on international economics and international political economy courses

bretton woods has become shorthand for the post war international financial and economic framework mindful of the historic 1944 conference and its legacy for the discipline of international economic law the american society of international law s international economic law group ielg chose bretton woods as the venue for a landmark scholarly meeting in november of 2006 a diverse group of academics and practitioners gathered to reflect on the past present and future of international economic law they sought to survey and advance three particular areas of endeavour research and scholarship teaching and practice service this book represents an edited collection of some of the exceptional papers presented at the conference including contributions from andreas lowenfeld joel trachtman amelia porges and andrew lang the volume is organised into three parts each covering one of the three pillars in the discipline of international economic law research and scholarship teaching and practice service it begins with an assessment of the state and future of research in the field including chapters on questions such as what is international economic law is it a branch of international law or of economic law how do fields outside of law such as economics and international relations relate to international economic law how do research methodologies

influence policy outcomes the second part examines the state and future of teaching in the subject chapters cover topics such as how and where is international economic law taught is the training provided in the law schools suitable for future academics government officials or practitioners how might regional shortcomings in academic resources be addressed the final part of the book focuses on the state and future of international economic law practice in the bretton woods era including institutional reform the contributors consider issues such as what is the nature of international economic law practice what are the needs of practitioners in government private practice international and non governmental organisations finally how have the bretton woods institutions adapted to these and other challenges and how might they better respond in the future international economic law the state and future of the discipline will be of interest to lawyers economists and other professionals throughout the world whether in the private public academic or non governmental sectors seeking both fresh insights and expert assessments in this expanding field indeed the book itself promises to play a role in the next phase of the development of international economic law

this accessible introduction to the world economy and to the theory and practice of globalization argues that key topics in international economics cannot be understood without knowledge of international business and vice versa it reviews and combines insights from both literatures and applies them to real world issues clearly explaining the main concepts of international economics and business in a uniquely integrated approach written in a lively and accessible style this innovative textbook covers all the main issues including international trade capital mobility comparative advantage foreign direct investments multinational behaviour financial crises and economic growth it has carefully selected international examples and case studies and special interest boxes which clearly explain more difficult economic concepts the companion website includes additional case studies exercises and answers to exercises data illustrations and links to other useful websites

voitovich presents a clear and lucid discussion of the manner and form in which international economic organizations ieos participate in two main stages of the international legal process law making and law implementation the book is based on normative instruments and fragments of practice of about fifty ieos in order to ensure a proper and timely realization of their normative acts ieos exercise a number of law implementing functions which are subject to a thorough comparative examination the author concludes that existing ieos not being ideal institutional models possess a sufficient arsenal of law implementing instruments to make a considerable impact on the international legal regulations in the economic field the book will be of interest to academics and economic political scientists

can cultural heritage be adequately protected vis à vis economic globalization this book investigates

whether and how international economic law governs cultural phenomena by mapping the relevant legal framework discussing the relevant disputes concerning cultural elements adjudicated before international economic courts namely the world trade organization adjudicative bodies and investment treaty arbitral tribunals and proposing legal methods to reconcile cultural and economic interests it thus provides a comprehensive evaluation of possible solutions including evolution of the law through treaty interpretation and reforms to improve the balance between economic governance and cultural policy objectives

international economic law iel refers to the rules governing economic relations at the international level and involving states international organizations and private entities this textbook explores iel within the broader context of public international law from the ground up providing all the foundational principles of international law essential for the study of iel the first part of the book is devoted to the analysis of actors and sources of iel while the second part focuses on the three main sectors of iel international investment law the law of international trade as developed through the work of the world trade organization wto and international financial and monetary law through references to conventional rules landmark cases and decisions of international organizations introduction to international economic law provides a clear and concise primer on the main issues in current iel it will be an ideal textbook for students taking introductory courses in iel as well as a useful guide for anyone wishing to learn about the subject and understand the dynamics behind it

do rich industrial nations underestimate the threat to their economic stability posed by demands for a new international economic order are the developing countries wrong to assume that their economic advancement depends on a transfer of wealth from the richer nations sir w arthur lewis s provocative analysis of the present economic order and its origins suggests that the answer to both questions is yes professor lewis perceptively illuminates aspects of recent economic history that have often been overlooked by observers of international affairs he asks first how the world came to be divided into countries exporting manufactures and countries exporting primary commodities high agricultural productivity and a good investment climate allowed countries in northwest

Europe to industrialize rapidly while the favorable terms of trade they enjoyed assured them and the temperate lands to which Europeans migrated of continuing dominance over the tropical countries at the core of the author's argument lies the contention that as the structure of international trade changes the tropical countries move rapidly toward becoming net importers of agricultural commodities and net exporters of manufactures even so they continue to depend on the markets of the richer countries for their growth and they continue to trade on unfavorable terms both of these disadvantages he concludes stem from large agricultural sectors with low productivity and will disappear only as the technology of tropical food production is revolutionized originally published in 1978 the Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press these editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions the goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905
