excerpt from the historical geography of europe vol 1 of 2 it is now several years since this book was begun it has been delayed by a crowd of causes by a temporary loss of strength by enforced absence from england by other occupations and interruptions of various kinds i mention this only because of the effect which i fear it has had on the book itself it has been impossible to make it what a book should if possible be the result of one continuous effort the mere fact that the kindness of the publishers allowed the early part to be printed some years back has i fear led to some repetition and even contradiction a certain change of plan was found unavoidable it proved impossible to go through the whole volume according to the method of the earlier chapters instead of treating europe as a whole i found it needful to divide it into several large geographical groups the result is that each of the later chapters has had to go over again

some small amount of ground which had been already gone over in the earlier chapters in some cases later lights have led to some changes of view or expression about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

excerpt from the relations of geography history every reader of history is aware that he must learn some geography if he would understand what he reads comparatively few however if one may judge from experience seem to realize how much light geography throws on history geographical influences account for much that happens or has happened geographical knowledge affords valuable data for solving historical problems at the same time human action alters the aspect of those things of which geography takes cognizance man cuts canals and tunnels mountains drains marshes and constructs artificial harbours though it must be admitted that these things are trifles compared to the steady operation of geographical causes all history through i have attempted to point out systematically how these causes work first in general and then in reference to the various countries of europe obviously this can only be done in specimens to do it fully would be to write all history afresh the specimens given may however i hope suffice to call the

attention of students of history to the modes in which geography operates so that they may be ready to perceive its influence on whatever period or country they may be dealing with about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
